Section 94522(a)(3) of the Aerosol Coating Products Regulation specifies a Product-Weighted Maximum Incremental Reactivity (MIR) limit for various aerosol coatings. The limits include a 1.20 grams ozone per gram product limit for Flat Paint Products. In addition, section 94525 of the Aerosol Coating Products Regulation allows any person who cannot comply with the requirements of section 94522, because of extraordinary reasons beyond the person's reasonable control, to apply to the Executive Officer for a variance. The criteria and procedures for granting a variance are specified in section 94525.

The applicant listed below has applied for a variance under section 94525 from the Product-Weighted MIR limit for Flat Paint Products.
