Linked California and Québec Cap-and-Trade Programs Carbon Market Compliance Instrument Report Aggregated by Type and Account

This report summarizes the number of compliance instruments held in the Compliance Instrument Tracking System Service (CITSS) accounts in the California (CA) and Québec (QC) Cap-and-Trade Programs. The data are presented by instrument type (allowances by vintages and offset credits by project type), and is aggregated for each type of account. Unless denoted with the issuing jurisdiction in parentheses (CA or QC), instrument types are issued by California, Québec or Ontario (see notes). For program participants in California and Québec, the accounts include: General (Holding) Accounts; Compliance Accounts; Limited Use Holding Accounts (CA entities only). The California and Québec jurisdiction accounts include: Voluntary Renewable Electricity Account (CA); Auction, Issuance and Allocation Accounts; Allowance Price Containment Reserve Account; Price Ceiling Account (CA); Retirement Account; Invalidation Account; Environmental Integrity Account (QC); and the Forest Buffer Account (CA). The information is aggregated by allowance type, regardless of the issuing jurisdiction. The account holdings of any entity may contain compliance instruments (allowances and offsets) issued by multiple jurisdictions. Besides the table on this page, the report contains additional tables that provide detailed accounting of the Forest Buffer (CA) and Environmental Integrity Accounts (QC), the Price Containment Reserve Accounts and Price Ceiling Account (CA).

This information was pulled from the Compliance Instrument Tracking System Service (CITSS) as of 9:00 am (PDT) and noon (EDT) on October 1, 2021. The report includes all allowances being held by program participants registered according to California and Québec Cap-and-Trade Programs Regulations. This report is typically released on the third business day of each calendar quarter.

Notes:

Ontario joined the linked Cap-and-Trade Program with Québec and California on January 1, 2018. On July 3, 2018, the Government of Ontario filed a regulation that revoked the Ontario cap-and-trade regulation. As of that date, there were 13,186,967 more allowances held in California and Québec accounts than the total number of allowances issued by those two jurisdictions alone. To maintain the environmental stringency of the linked market, California and Québec have respectively retired 11,340,792 and 1,846,175 allowances to account for the remaining Ontario allowances. California retired an equal amount of vintages 2021 through 2030 and Québec retired vintage 2017 allowances.

\* Voluntarily surrendering allowances to the Retirement Account is permanent and does NOT fulfill any compliance obligations.

In 2021, pursuant to section 95913(h)(1)(C), the Executive Officer transferred the allowances remaining in the three-tier Reserve Account as of December 31, 2020 to the Price Ceiling Account. This did not include the Reserve allowances that were already transferred to the current two-tier Reserve account pursuant to section 95913(h)(1)(A).

(1) The California Air Resources Board (CARB) transfers allowances to eligible electrical distribution utilities and natural gas suppliers (consigning entities) each year. A Limited Use Holding Account (LUHA) is created for each consigning entity, and a consigning entity must offer for sale at auction by the end of each year all the allocated allowances that have been placed in the LUHA.

(2) See the Reserve Price Ceiling table for more details.

(3) See CA Offset Credits table for more details.
