---

Dear Renee,

CARB staff are reviewing the Port and Terminal Plans for the Port of San Diego, and have identified a minor additional piece of information we need in order to deem the Plans complete. We note that the Plans provide the number of vessel *visits* expected to use the planned control strategies, which is much appreciated, but we also need the number of vessels expected to use the strategies (as required by section 93130.14(3)(B) of the Regulation). We would like to request you to kindly resubmit the Plans with the revised information for CARB's record so that we can deem these Plans complete.

Please let us know if you have any questions.

Thanks and best regards,  
Nicole Light Densberger
