**Linked California and Québec Cap-and-Trade Programs Compliance Instrument Report - Aggregated by Type and Account**

This report summarizes the number of compliance instruments (allowances and offset credits) held in all Compliance Instrument Tracking System Service (CITSS) accounts in the California (CA) and Québec (QC) Cap-and-Trade Programs as of 9:00 am Pacific Time/12:00 PM Eastern Time on July 2, 2024. The report includes all compliance instruments held in California and Québec jurisdiction accounts and by participants registered according to each program's regulations. The data are presented by vintage for allowances and by project type for offset credits. Unless denoted with the issuing jurisdiction in parentheses (CA or QC), instrument types are issued by California, Québec, or Ontario. For program participants, the CITSS account types include General Accounts, Compliance Accounts, and Limited Use Holding Accounts (CA entities only). The California and Québec jurisdiction accounts include the Voluntary Renewable Electricity Account (CA), Auction Account, Issuance Account, Allocation Account, Retirement Account, Invalidation Account, Allowance Price Containment Reserve Account, Price Ceiling Account (CA), Environmental Integrity Account (QC), and the Forest Buffer Account (CA). An entity's account may contain compliance instruments issued by multiple jurisdictions. In addition to the overview of all compliance instruments provided on this page, subsequent pages of this report provide more detailed information about holdings of DEBS and non-DEBS offset credits, and the holdings in the Price Containment Reserve Accounts and Price Ceiling Account (CA). This report is typically released on the third business day of each calendar quarter.

Allowance Vintage	Entity Accounts				Jurisdiction Accounts					All Accounts
	General	Compliance	Limited Use Holding Account (CA) <sup>(1)</sup>	Voluntary Renewable Electricity (CA)	Auction + Issuance + Allocation	Retirement <sup>(2,3)</sup>	Invalidation	Reserve + Price Ceiling (CA) <sup>(4)</sup>	Environmental Integrity (QC) + Forest Buffer (CA) <sup>(5)</sup>	Total

**Footnotes:**

- (1) CARB transfers allowances to eligible electrical distribution utilities and natural gas suppliers (consigning entities) each year. A Limited Use Holding Account (LUHA) is created for each consigning entity. Every consigning entity must offer for sale at auction by the end of each year all the allocated allowances that have been placed in their LUHA.
- (2) Ontario joined the linked Cap-and-Trade Program with Québec and California on January 1, 2018. On July 3, 2018, the Government of Ontario filed a regulation that revoked the Ontario cap-and-trade regulation. As of that date, there were 13,186,967 more allowances held in California and Québec accounts than the total number of allowances issued by those two jurisdictions alone. To maintain the environmental stringency of the linked market, California and Québec retired 11,340,792 and 1,846,175 allowances, respectively, to account for the remaining Ontario allowances. California retired vintage 2021-2030 allowances in equal number for each vintage, and Québec retired solely vintage 2017 allowances.
- (3) The Retirement Account includes allowances and offset credits surrendered for a compliance obligation as well as those surrendered voluntarily, which are not used to meet a compliance obligation.
- (4) The number of allowances available in each Tier or Category of the jurisdiction's Reserve Account is shown in the table on the Reserve and Price Ceiling Tab (i.e. Page 2 of 3 in the PDF).
- (5) California offset credits are disaggregated by those that provide Direct Environmental Benefits to the State (DEBs) and those that do not (non-DEBs) in the table on the CA Offset Credits Tab (i.e. Page 3 of 3 in the PDF).
