

**Bay Area Air Quality Management District  
Community Air Protection Program  
Final Report – Grant #21-CAPP-3  
October 31, 2024**

The Bay Area Air Quality Management District is submitting this final report in compliance with the requirements of the agreement governing the use of the funds provided through the Community Air Protection Grant #21-CAPP-3. The Air District has expended the balance of the Community Protection Grant, including earned interest of \$330,884. **This final report covers activities and expenditures for the period from April 1, 2023 through August 31, 2024.**

A breakdown of expenditures is provided in Table A.

---

**How Use of Grant Meets AB 617 Goals**

The Air District has used the 21-CAPP grant to meet the goals of the AB 617 program. Grant funds were used to support two existing community steering committees, and to seat and support two additional community steering committees. Funds were used to provide staff support to committees in developing and implementing their community emission reduction plans and/or monitoring plan. Staff support includes preparing agendas, meeting materials and managing and administering co-lead and facilitation contracts for all community steering committees. Funds were also used for plan development and implementation, annual reporting, community air monitoring, community air monitoring plan quarterly and/or annual progress reports, internal coordination, coordination with partner agencies, and enforcement activities.

**Summary of Work Completed**

Via the AB 617 Program, the Air District accomplished the following work during the reporting period:

**West Oakland**

- [Monthly Steering Committees \(remote via Zoom\) and supporting contracts with professional facilitators](#) in West Oakland. The co-leads continued meeting weekly to guide plan implementation and to plan monthly Community Steering Committee (CSC) meetings. All meetings were remote with logistical support from the co-leads (West Oakland Environmental Indicators Project and the Air District) and professional facilitators. The 2023 workplan for implementation of the West Oakland community emission reduction plan includes enforcement and strategy status discussions twice per year, as well as regular evaluations of the internal implementation processes and the CSC meetings. In April 2023, the CSC heard its first semi-annual enforcement-focused status report and discussed enforcement complaint data related to odors, trucking, and illegal land uses.
- Continued implementation of enforcement strategies identified in the West Oakland community emission reduction plan, including updating the online complaint reporting system, increased inspection frequency of permitted sources, development of outreach regarding open burning, and enhanced referral of enforcement for unpermitted operations such as emissions from generators used at cannabis grow operations. Community Steering Committee members also provided input and comments to the Oakland General Plan's Environmental Justice elements

that align with West Oakland community emission reduction plan strategies. The City of Oakland adopted its Environmental Justice General Plan elements which incorporated plan strategies #22 and #83. Additionally, the City put into place truck-intensive business zoning rules requiring stringent rules within 500 feet of residential, and other health-protective industrial zoning updates (i.e., related to West Oakland community emission reduction plan strategy #5).

- The West Oakland co-leads held an end-of-the-year town hall in December 2023 at a community center in West Oakland, that included educational and information displays pertaining to the plan. The year 2024 marks a significant milestone in plan implementation because this is the final year of the implementation schedule. In 2024, where West Oakland Environmental Indicators Project (WOEIP) and the Air District, as plan implementation co-leads shifted to hosting working sessions for CSC members and moving to bi-monthly CSC meetings with a focus on the five-year annual report (2020 –2024). The co-leads spent from May – July 2024 assessing strategies of the plan and speaking to respective public agencies and making recommendations on a series of strategies identified either as completed, continued, revised and/or closed out. Air District staff and West Oakland Environmental Indicators Project leadership continue to work on the five-year annual report which was presented at the September 2024 CSC meeting.

#### **Richmond/North Richmond/San Pablo**

- Implementing the [\*Path to Clean Air: Richmond-San Pablo Community Air Monitoring Plan\*](#) (CAMP). The plan summarizes community outreach, capacity building, and decision making undertaken to date and to guide additional air monitoring in the Richmond-San Pablo area. For the air toxics study that was mapped out in the CAMP, data collection and quality assurance were ongoing through this period and data analysis began.
- Monthly meetings of the [\*Path to Clean Air, Richmond-North-Richmond-San Pablo, CERP Community Steering Committee\*](#) (CSC) continued as the CSC developed the community emission reduction plan.
- Two Ad Hoc Committees of the CSC met monthly during the reporting period. A Problems to Solutions Ad Hoc continued meeting weekly to work on developing strategies and actions for key community concerns.
- A Governance Ad Hoc met weekly to develop an updated charter to reflect their community governed status, which was approved in June 2023 by the CSC. The Governance Ad Hoc led the recruitment of three new government non-voting members representing Contra Costa County, City of Richmond, and the City of San Pablo.
- In July 2023 the CSC voted to approve the three new local government representatives. Also, in July 2023 the CSC established review teams and a process approach to ensure the CSC had a structured process to review the CERP strategies and actions. The CSC also developed plan-level goals beginning with a staff presentation at the [\*May 2023 meeting\*](#), an alignment activity at the [\*June 2023 meeting\*](#), and the formation of a small work group. The work group met twice in July 2023 and presented draft goals to the CSC at the [\*August 2023 meeting\*](#).
- A Community Outreach and Engagement standing committee was established in the summer of 2023 and was co-led by two CSC members with the support of Air District staff. The Committee supported the development of all outreach materials, factsheets, FAQs, and presentation decks

during final development and public review of the draft community emission reduction plan, *Path to Clean Air Plan* (PTCA). The CSC monthly meetings from May - September 2023 covered strategy for public outreach, process, and approach to public engagement. A PTCA timeline/ process to develop the PTCA Plan was consistently communicated throughout the monthly CSC meeting. Outreach materials were reviewed from June – September 2023 at monthly steering committee meetings which also included Committee updates on presentations to neighborhood groups, local agencies, and non-governmental organizations.

- The Community Outreach and Engagement Committee provided a series of presentations from August 2023 through March of 2024 on the Draft PTCA Plan. During these presentations, members educated community members regarding the draft plan, inspired participants to take action to support the Plan through the public comment period (December 13 – January 19, 2024) and encouraged members of the public to increase their understanding of AB 617, Draft PTCA Plan and the role of the PTCA steering committee. The Air District held a public workshop on the Draft PTCA Plan on January 11, 2024. The steering committee also attended events and conducted individual on-line engagement (i.e., email blasts, meet and greet requests to NGOs, Healthcare provider, Medical Association, and workplace announcements) to promote the Draft PTCA Plan.
- In February 2024, the Air District provided three documents that were made publicly available as part of the follow up to the January 11, 2024 workshop and public comment period that included: Summary of response and comments by theme of Draft PTCA Plan, a table distilling all comments and Air District response, and public comment emails and draft letters (redacted). At the February 28, 2024 CSC meeting, the committee approved unanimously to direct staff to apply non-substantive edits to the Final Draft PTCA Plan. During the same meeting, the CSC also approved revisions to their charter and introduced a new leadership structure – three new leads.
- In March 2024, the CSC voted unanimously to approve the Draft Final PTCA Plan and elected three new leads. On April 22, 2024, the Community Equity Health and Justice Committee (CEHJ) held a special committee meeting at the City of San Pablo, Council Chambers. During the meeting the CEHJ unanimously approved recommending that the Air District Board consider the Draft Final PTCA Plan. At its May 2024 meeting the Air District Board of Directors voted unanimously to: (i) adopt the Draft Final PTCA Plan; and (ii) approve the determination that adoption of the Draft Final PTCA Plan is exempt from the California Environmental Quality Act (CEQA) .
- The CSC Leads had their first kick off meeting on May 16<sup>th</sup> with Air District staff and on May 20<sup>th</sup> held their first hybrid meeting at Air District's Richmond headquarters office. Air District staff and the CSC Leads spent the month of July discussing the PTCA implementation framework which is an approach to prioritize actions with the CSC for year one of implementation of the Plan. In August at the CSC monthly meeting members convened in a prioritization exercise of the PTCA Plan actions. This exercise will inform Year One implementation planning. Part Two of the prioritization of actions occurred on September 23, 2024.

## **East Oakland**

- [Monthly meetings of the East Oakland Community Steering Committee \(CSC\)](#). In those meetings, the CSC adopted a charter, elected co-chairs and developed their community vision and guiding principles for the community emission reduction plan (CERP).
- With the support of the CSC, the Air District, CBE and CSC Co-Chairs sent a letter to CARB requesting an extension to the CERP timeline on May 31, 2023. The request was acknowledged and approved by CARB in an email received on July 20, 2023.
- The CSC approved the East Oakland CERP Community Boundary. Subsequently, the Air District's Assessment, Inventory and Modeling division prepared and then presented the East Oakland Community Emissions Inventory to the CSC in August 2023.
- The Air District launched a grant program in July 2023 to solicit partnership with eligible nonprofit organizations located in or serving communities within the East Oakland CERP project area to conduct outreach for a community mapping project. The purpose of the community mapping project was to leverage community knowledge to identify air pollution concerns and community assets in East Oakland to support the CERP. An analysis of the data collected through the mapping project was presented to the CSC in November 2023 and helped inform the five focus areas for CERP strategies and actions. The CSC also received presentations from CBE on their "Strategies Focused Approach" to include long-standing, local community concerns in the process.
- Since February 2024, the East Oakland CSC has been engaged in brainstorming strategy and solution statements for each of the established CERP focus areas and toured Argent Materials and the San Francisco Bay Oakland International Airport.

## **Bay View Hunters Point/Southeast San Francisco**

- After being selected in CARB's 5<sup>th</sup> cycle of CERP designations in February 2023, the Air District and two community co-leads (Marie Harrison Community Foundation and Bayview Hunters Point Community Advocates) recruited and selected 20 community members for the Bayview Hunters Point/Southeast San Francisco Community Steering Committee (BVHP-SESF CSC) through an open application process. The Air District and community co-leads held three orientation sessions for the selected steering committee members in July, August, and October 2023.
- In January 2024, the BVHP co-leads kicked off the monthly meetings of the Bayview Hunters Point/ Southeast San Francisco Community Steering Committee. The first few meetings introduced the BVHP-SESF CSC to the CERP development process. In following meetings, the CSC adopted their Charter, completed a community mapping process to identify areas of concern, and received technical presentations on rules, permitting, compliance and enforcement, and zoning and land use. The CSC created two co-chair positions.

- In June 2024, a subcommittee of the BVHP CSC formed to explore and discuss Air District data on emissions sources, permitted, unpermitted and exempt facilities, and general technical questions about air quality. The subcommittees reports out to the full BVHP-SESF CSC monthly.
- In August 2024, the BVHP CSC voted to approve the community boundary.
- Released regionwide [mobile air monitoring data](#). Data was created via a mobile monitoring data collection project through a contract with Aclima, Inc. More information on the project may be found [here](#).
- Continued evaluation of the regulations listed on the Air District's [AB 617 Expedited BARCT Implementation Schedule](#), and pursual of regulatory amendments where additional emissions reductions are feasible.
- Ongoing [improvements to methods and techniques used in community-scale emissions inventories and modeling](#) of pollutant concentrations and health risks. During this period, the Air District developed detailed emissions estimates for all Bay Area roadways, rail lines, and rail yards and conducted dispersion modeling to develop maps of PM<sub>2.5</sub>, cancer risk, and chronic hazard index contributed by these sources. [These maps](#) were developed to aid new-project environmental review but will also serve as a starting point for assessments in any current or future AB 617 communities in the Bay Area.
- Draft community-scale modeling of toxic air contaminants and fine particulate matter contributing to exposures in the community as [presented to the Community Steering Committee](#).
- Developing a new search tool on the Air District's website for members of the public to view and access information on Notices of Violations issued in communities.

In addition to the links to specific reports and program activities provided above, the Air District has posted [online agendas, presentations and documents](#) developed with support from the Community Air Protection Grant.

### Outreach Events

(Including date, location, topics, and number of attendees for each event.)

Event	Date	Location	Topics	Number of Attendees
<b>Bayview Hunters Point/ Southeast San Francisco</b>				
BVHP/SESF Meet and Greet	07/12/2024	Bayview Hunters Point Advocates, 2095 Jerrold	Introductions to the partners and CSC members, introduction to the	35

		St. San Francisco, CA	CERP development process	
BVHP/SESF Orientation	08/01/2024	St John's Missionary Baptist Church, 825 Newhall St, San Francisco, CA 94124	Overview of the details required for a CERP	39
BVHP/SESF CSC Bus Tour	10/28/2024	Old Skool Cafe, 1429 Mendell St, San Francisco, CA 94124	Bus Tour of sites of concern and sensitive populations in the AB617 boundary areas	40
