Public Workshop

Soil Nitrogenous Emissions "Subject Matter Expert Review Panel" Contract Kick-Off

en español

The California Air Resources Board (CARB) invites you to participate in a public workshop on May 7, 2024 to kick-off the *Soil Nitrogenous Emissions "Subject Matter Expert Review Panel (SMERP)" Contract (23RD017)*. In August 2023, CARB released the [nomination/application form](#) to seek five technical experts to serve in the SMERP that will independently evaluate existing data and science to improve our current understanding of nitrogenous emissions, including oxides of nitrogen, nitrous oxide, and ammonia from soils, particularly in California. CARB's Research Division is leading the panelist selection and contract management process. They evaluated all received nominations and applications under this solicitation, and selected panelists for the SMERP based on an evaluation of their technical merits (e.g., peer-reviewed publications and government reports, service in advisory, editorial, and review boards) under each Topic of Expertise specified in the [nomination/application form](#).

As part of the SMERP, Dr. William Horwath (University of California [UC] Davis), Dr. Whendee Silver (UC Berkeley), Dr. Xia Zhu-Barker (University of Wisconsin - Madison), Dr. Martin Burger (California Department of Food and Agriculture [recently retired]; UC Davis), and Dr. Viney Aneja (North Carolina State University) will conduct a comprehensive review of scientific literature, pertinent databases, and emission estimation methodologies that pertain to nitrogenous emissions from soils. The contract will provide CARB with guidance and information on the best scientific evidence for nitrogenous emissions from soils, and will inform the subsequent steps needed to refine the underlying data and methods currently used in our regional air quality modeling to support the State Implementation Plans.

Please join the workshop to find out more from the selected SMERP members discussing plans and process through end of contract in 2025. We welcome your feedback and engagement.

Date: May 7, 2024
Time: 11:00 a.m. – 12:00 p.m. PDT
Location: [Zoom Meeting \(Remote Only\)](#)

Please register in advance for the meeting. After registering, you will receive an email with information about joining the meeting.

Participants will be able to engage in an active discussion during the Zoom meeting and can also send written questions or comments to CARB staff and the SMERP panelists during the meeting through Zoom. If you have questions about the meeting purpose, scope and logistics, please contact [Kevin Eslinger](#).
