Re: RNG MOOVERS, LLC Tier 2 Pathway Application No. B0544; Response to Claude Duss

RNG MOOVERS LLC (“RNG Moovers”), a subsidiary of Archaea Energy Inc. (“Archaea Energy”), writes to address the comment received from Claude Duss regarding the Tier 2 Pathway Application (No. B0544) for RNG MOOVERS SOARES (“the Project”).

The Project is eligible under the California Low Carbon Fuel Standard (“LCFS”) Biomethane from Anaerobic Digestion of Dairy and Swine Manure pathway. Pursuant to §95488.7(d)(5)(A) of the LCFS regulations, “Only comments related to potential factual or methodological errors will require responses from the fuel pathway applicant.” The public comment received is not related to factual or methodological errors and appears to be expressing an opinion on the dairy industry with generalizations not directly related to the Tier 2 Pathway Application. Given no changes are suggested that would require revisions to the Tier 2 Pathway Application, RNG Moovers respectfully requests CARB proceed with certification.

Sincerely,

DocuSigned by:
