

The Road to 2020: Is Your Vehicle Ready?

*Truck & Bus Regulation compliance scenarios
for Lighter Vehicles (14,001-26,000 lbs GVWR)*

Vehicles subject to CARB's Truck and Bus Regulation must meet the health-based requirements of the rule. If you have a vehicle subject to the Truck & Bus Regulation, you must upgrade to a newer, cleaner engine and/or remove the older vehicle from the fleet. Act now! If you are currently out of compliance, you may be subject to penalties and registration holds now. Starting in 2020, new state law requires the DMV to place automatic registration holds on vehicles that do not meet the requirements of the Regulation.

I own a lighter vehicle that is not reported into the TRUCRS reporting system for a flexibility option and is powered by a 1999 or older model year engine. Is my vehicle compliant with the Regulation?

Your vehicle is currently out of compliance with the Truck and Bus Regulation. You are subject to registration holds and penalties. To avoid enforcement action, you can do one of the following immediately:

- Retrofit (this will only allow operation of the vehicle through 2020)
- Repower the vehicle with a 2010+ model year engine
- Replace the vehicle with a 2011+ model year vehicle with a 2010 or newer engine
- Remove the vehicle from the fleet

Note: Limited flexibility options may be available. Proof of eligibility will be required.*

I own a lighter vehicle currently in compliance with the Truck and Bus Regulation (using a flexibility option or is a 2000-2009 model year engine). What do I need to keep my vehicle in compliance with the Regulation?

These vehicles will be phased out by 2023 based on the model year schedule, unless otherwise reported for a flexibility option. Your options are to:

- Repower the vehicle with a 2010+ model year engine by the turnover date
- Replace the vehicle with a 2011+ model year vehicle with a 2010 or newer engine by the turnover date
- Remove the vehicle from the fleet by the turnover date

Note: Limited flexibility options may be available. Proof of eligibility will be required.*

I own a lighter vehicle that is powered by a 2010 or newer model year engine. Is there anything else I need to do?

You are in full compliance with the Truck and Bus Regulation and no further action is required. However, if the vehicle model year is 2010 you will need to provide that information to CARB. These vehicles will be allowed to register with DMV for operation on California roadways.

*Currently, flexibility options may be available for vehicles that operate a limited number of miles in California.

The Road to 2020: Is Your Vehicle Ready?

*Truck & Bus Regulation compliance scenarios
for Heavier Vehicles (26,001+ lbs GVWR)*

Vehicles subject to CARB's Truck and Bus Regulation must meet the health-based requirements of the rule. If you have a vehicle subject to the Truck & Bus Regulation, you must upgrade to a newer, cleaner engine and/or remove the older vehicle from the fleet. Act now! If you are currently out of compliance, you may be subject to penalties and registration holds now. Starting in 2020, new State law requires the DMV to place automatic registration holds on vehicles that do not meet the requirements of the Regulation.

I own a heavier vehicle that is not reported into TRUCRS for a flexibility option and is powered by a 1995 or older model year engine without a diesel particulate filter. Is my vehicle compliant with the Regulation?

NOTE: Vehicles with a filter installed and reported into TRUCRS have may additional time to comply with upgrade requirements.

Your vehicle is currently out of compliance with the Truck and Bus Regulation. You are subject to registration holds and penalties. To avoid enforcement action, you can do one of the following immediately:

- Retrofit (this will only allow operation of the vehicle through 2020)
- Repower the vehicle with a 2010+ model year engine
- Replace the vehicle with a 2011+ model year vehicle with a 2010 or newer engine
- Remove the vehicle from the fleet

Note: Limited flexibility options may be available. Proof of eligibility will be required.*

I own a heavier vehicle currently in compliance with the Truck and Bus Regulation (equipped with a retrofit and is a 2000-2009 model year engine). What do I need to do to keep my vehicle in compliance with the Regulation?

These vehicles will be phased out by 2023 based on the model year schedule, unless otherwise reported for a flexibility option. Your options are to:

- Repower the vehicle with a 2010+ model year engine by the turnover date
- Replace the vehicle with a 2011+ model year vehicle with a 2010 or newer engine by the turnover date
- Remove the vehicle from the fleet

Note: Limited flexibility options may be available. Proof of eligibility will be required.*

I own a heavier vehicle that is powered by a 2010 or newer model year engine. Is there anything else I need to do?

You are in full compliance with the Truck and Bus Regulation and no further action is required. However, if the vehicle model year is 2010 you will need to provide that information to CARB. These vehicles will be allowed to register with DMV for operation on California roadways.
