

Applicant Name	Project Description	Amount of Funding Requested	Project expected to provide benefits to priority populations
A. Phillip Randolph Community Development Corporation	This project will serve the Bakersfield area. The project aims to help the community build capacity for partnering with local air districts to identify, evaluate and reduce air pollution and exposure to harmful emissions. The project will also provide targeted community air monitoring, educating residents to reduce air pollution in their homes, provide awareness to residents and in turn reduce pollution related sickness.	\$ 420,247.00	Yes
Acterra: Action for a Healthy Planet	This project will serve North San Jose, Milipitas, and South Fremont areas. The project aims to augment odor enforcement process by sharing real-time data from community monitors with the public, regulatory agencies and area facilities to expedite response and corrective action. The project will collect and compile air quality data sets for public health impact assessments and collaborate with stakeholders to identify and prioritize emission reduction strategies.	\$ 459,600.00	Yes
Antelope Valley Dust Control Group	This project will serve the unincorporated rural community of Antelope Acres in Los Angeles County. The project will obtain vital information and data for the area. The project will inform the residents on AB 617 and safe land management practices, identify active blowsand sources that impact Antelope Acres and create a plan to address these sources.	\$ 81,607.00	Yes
Antelope Valley Dust Control Group	This project will serve the Rancho Seco, Antelope Valley area. The project will focus on active blowsand source areas. The project will provide education of landowners to prevent future unneeded land disturbances; stabilization of active blowsand sources; improved air quality; reduced adverse health effects caused by inhalation exposure and more. The project will also have ongoing monitoring of blowsand transport as the driving force for PM10 emissions using regularly collected on-site measurements to assure continuation of desert land stability.	\$ 205,356.00	Yes
Big Pine Paiute Tribe of the Owens Valley	This project will serve the Owens Valley area. The project includes the acquisition, installation, and operation of a device for the continuous monitoring of ambient particulate matter. The program will also be contributing to local Tribal air networks with the data collected from the permanent air station that they would be able to produce.	\$ 102,933.00	Yes
Bike Bakersfield	This project will serve Bakersfield. The project will provide residents with knowledge of AB 617 through the use of bilingual workshops. The project aim is to create a more active community of people who walk or ride their bicycles more, through outreach and engagement, social media and promotional strategies, and continual implementation of Bike Bakersfield and partner programs.	\$ 154,432.00	Yes
BikeSGV (A Project of Community Partners)	This project will serve the San Gabriel Valley and El Monte areas. The project will increase community awareness of AB 617; provide interactive and engaging opportunities to educate the public about local air quality; and facilitate community participation in the AB 617 implementation process. Project organizers will focus on empowering youth and families on air quality issues given the significant health impacts of air pollution on children's development and well-being.	\$ 50,000.00	Yes
Black Business Association	This project will serve the South Los Angeles, Compton, Carson, Long Beach, San Pedro and Wilmington areas. By utilizing data collection and analysis, input from communication forums, those impacted will better understand physical and mental health issues. This project also plans to develop a coalition comprised of homeowners, renters, businesses; and environmental and community activists to address the broad impact of air pollution.	\$ 375,000.00	Yes
Blue Lake Rancheria	This project will serve the Blue Lake Rancheria Tribe. The project will collect data for a year for their region, gathered in partnership with the City of Blue Lake and focus on community engagement on AB 617, community monitoring. The data collection would be followed by the development of a Quality Assurance Project Plan.	\$ 100,413.00	Yes
BREATHE California of Los Angeles County	This project will serve the Los Angeles County area. The project will apply smart technologies to public health, distributing "smart" inhalers to asthmatic children in underserved LA County communities. These inhalers act as geolocators for poor air quality, the usage/location data will be made available to community members as a tool for improved asthma management and customized treatment plans.	\$ 500,000.00	Yes
California Black Health Network	The project will serve Riverside and San Bernardino Counties. The project goal is to implement a citizen science air monitoring program. The project will enhance the community collaboration building and engagement, skills and training such as the identification of air pollutants most adversely impacting minority communities as well as offering air monitoring devices.	\$ 500,000.00	Yes
California Safe Schools (A Project of Community Partners)	This project will serve the Los Angeles County area. The project will educate members of the public by raising awareness of air pollution. The project also aims to conduct partnerships and coalition-building and facilitate interaction with government agencies.	\$ 150,000.00	Yes

CARE Advocates Inc.	This project will serve the Ontario, Fontana, Colton, and San Bernardino areas. The project will aim to improve air quality and public health, and create energy-efficient, high-density, transit-oriented housing. The project would provide AB 617-focused education to seniors and children in an inter-generational classroom setting.	\$	716,746.00	Yes
Casa Familiar	This project will serve the San Ysidro area. The project will provide residents with the necessary data to better understand air quality impacts. The project will use the data to develop public health initiatives and projects to reduce exposure, raise awareness and engage federal officials in demanding efficient border crossing wait times.	\$	492,269.00	Yes
Catholic Charities of the Diocese of Stockton	This project will serve the Port of Stockton area. This project intends to realize the engagement and participation goals of AB 617 through the following: educating the community regarding environmental issues and increase their awareness and understanding of AB 617; learn to advocate for clean air and learn to identify major sources of pollution; learn to advocate for sustainable communities via engagement in local planning and to articulate their concerns and ideas for solutions in a way they can present to their representatives, elected officials, and agencies locally, regionally, and state-wide.	\$	150,000.00	Yes
Central California Asthma Collaborative	This project will serve the San Joaquin Valley area. The project will focus on the historically-neglected communities by providing residents with information and partnering them with community-based organizations to make sure that residents are part of the conversation. The project will provide expertise to the community in both understanding the sources and health impacts of local pollution and the potential policies necessary to address them. It will provide additional community air monitoring to acquire new information regarding air quality, and relay it to the community.	\$	499,993.00	Yes
Centro Binacional para el Desarrollo Indigena Oaxaqueno	This project will serve the Fresno area. The project will focus on AB 617 education and outreach, particularly to indigenous Oaxacan and Guerreran communities, to complement the ongoing development of community air monitoring throughout the Central Valley of California. The project will provide the linguistic support needed to fully engage indigenous communities with culturally informed materials.	\$	50,000.00	Yes
Charitable Ventures of Orange County	This project will serve the Madison Park and Santa Ana areas. The project will support logistical and technical assistance to expand the engagement between Madison Park residents, and it will create a plan for community-based monitoring of air pollution and its effects, then pilot this program.	\$	185,118.00	Yes
Citizens for Responsible Oil & Gas - CFROG	This project will serve Ventura County. The project will focus on monitoring to identify the air emission sources and fill existing data gaps through a community-based research project in three neighborhoods where pollution burdens are the greatest. The project will foster citizen scientists to identify sources of pollution and document resident concerns about toxic hazards.	\$	496,923.00	Yes
Clean Water Fund	This project will serve the Lost Hills area. The project aims to develop and strengthen community capacity, develop and strengthen relationships with regulatory agencies, other NGOs and other agencies. The project also aims to identify types, levels and sources of criteria pollutants and toxic air contaminants, to improve community health and to become a model for other disadvantaged communities.	\$	380,966.00	Yes
Coalition for Clean Air	This project will serve the Maywood area. The project will identify and evaluate toxic pollutants and develop action plans for reducing local toxic air pollution. The project will also engage the community in air monitoring activities to protect public health. The project aims to determine concentration levels of toxic sources, facilitate active community participation in air quality issues and develop a community-specific actionable emission reduction and mitigation plan that the community can use in future grant applications or projects.	\$	500,000.00	Yes
Comite Civico Del Valle, Inc.	This project will serve the Imperial County and Eastern Coachella Valley areas. The project will maintain the IVAN air network and improve upon it by monitoring other pollutants of concern to the community. The project will focus on expanding into methane monitoring, as there is no present monitoring in Imperial on methane.	\$	500,000.00	Yes
Valley LEAP	This project will serve the San Joaquin Valley and Kings County areas. The project will begin building a comprehensive community based monitoring network adding to the single PM 2.5 monitor already installed and operating in Huron. The project will include community outreach and educational materials for communities where there will be deployment of monitoring networks.	\$	499,893.00	Yes
Comite Civico Del Valle, Inc.	This project will serve the Salton Sea air basin. The project will inform communities about the AB 617 implementation process, educate communities about particulate matter (PM 2.5 and PM 10) and ozone in regards to public health, educate communities on how to reduce exposure to contaminants and engaging these communities.	\$	150,000.00	Yes

Communities for a Better Environment	This project will serve Wilmington, Southeast Los Angeles, East Oakland and Richmond areas. This project will aim to increase awareness and engagement of the residents in order to effectively engage in decision-making; in-house technical assistance will be provided.	\$	97,857.00	Yes
Community Focus (a Project of the Tides Center)	This project will serve the Pittsburg area. This project will support environmental education, air quality measurement, and community engagement. The project will be implemented at three middle schools and two high schools, educating students about how they can reduce air pollution geared toward reducing particulate matter exposure.	\$	229,698.00	Yes
Community Science Institute CSI for Health and Justice	This project will serve cities throughout California. The Bucket Brigade project will focus on toxic air monitoring. The CSI project will provide community technology assessments, community technical training (monitoring and technical education including data collection and analysis), community-led community air protection efforts and community air monitoring support.	\$	431,165.00	Yes
Consejo de Federaciones Mexicanas en Norte America	This project will serve Bell Gardens, Huntington Park, South Gate, Lynwood, Maywood, Cudahy and Bell areas. The project will focus on raising the knowledge of residents about the causes of air pollution, its impact on public health, and adding individuals to COFEM's database of community members interested in being active supporters of the We Expect Clean Air Now (WECAN) campaign.	\$	50,000.00	Yes
Cut-A-Tree	No application	\$	180,000.00	Yes
Desert Healthcare Foundation	This project will serve the Palm Springs/Coachella Valley area. The project will deploy a mobile monitoring vehicle, strategically placed near known sources of air pollution to identify and characterize community areas experiencing disproportionate air pollution impact. The project also aims to develop a regional strategic action plan to mitigate the impacts.	\$	499,773.00	Yes
East LA Community Corporation	This project will serve the Boyle Heights area. The Healthy Homes project will help residents understand how upgraded residential filtration can improve air quality. The project will evaluate how simple, cost-effective filtration interventions can mitigate adverse near-road air quality impacts.	\$	500,000.00	Yes
Ecology Center	This project will serve West Berkeley, East and West Oakland areas. This project involves two coalitions working together to engage residents living in overburdened communities to identify toxic release sources and develop strategies to improve air quality. This project will foster the next generation of environmental youth leaders through the Ecology Center's Youth Environmental Academy (YEA). This project is proposing to develop and implement a multi-faceted community climate action education approach using educational activities including reskilling workshops, community events, and demonstration projects.	\$	50,000.00	Yes
Environmental Health Coalition	This project will serve the San Diego area. The project will aim to educate residents so that they better understand air quality issues and the resulting health risks. The project will provide leadership development to engage residents in community advocacy and provide opportunities to act on issues. Furthermore, the project will support community-based research.		\$500,000	Yes
Fort Independence Indian Community of Paiutes of the Fort Independence Reservation	This project will serve the Independence (Owens Valley) area. The project will increase community participation and will aim for one single designed website for tribal air quality data and related information. The project will aim to build strong networks to facilitate the extensive community outreach in tribal communities and Inyo County, with an established community advocacy group for their disadvantaged community stakeholders.	\$	326,770.00	Yes
Fort Ord Environmental Justice Network	This project will serve the Fresno area. The project will focus on improving the quality of health and life for impacted, impoverished low-income communities by identifying and assisting EJ stakeholders to participate in the decision-making processes. Collaborating with academia to collect data in communities affected by environmental issues, the project will enhance community understanding of environmental issues.	\$	40,150.00	Yes
Fresno Metropolitan Ministry	This project will serve the Central Fresno area. The project aims to inform, engage, empower and partner with students and parents in two low-income and disadvantaged central Fresno neighborhoods to master data about air quality and solutions, and to design a plan of action that can be replicable.	\$	150,000.00	Yes
Friends of Calwa. Inc.	This project will serve the Calwa and Fresno areas. The project will focus on implementing the Healthier Calwa project to engage Calwa residents through ongoing monthly neighborhood association meetings to build general awareness of AB 617 and develop relevant public education presentations that will be facilitated by community residents. The project will also identify 10 community members to serve as Calwa ambassadors to lead advocacy efforts, meet with decisionmakers and serve as an internal advisory committee.	\$	149,965.00	Yes

Generation, Vision and Future	This project will serve the Richmond area. The project will educate the community on environmental issues affecting the area. The project will help give families living in polluted areas knowledge of how they can help their community become aware of pollution in the air, as well as provide training, and unite to come up with solutions that can help the environmental health of the community.	\$	27,510.00	Yes
Greenaction for Health and Environmental Justice	This project will serve the Bayview Hunters Point (BVHP) area of San Francisco. This project will provide technical assistance and capacity needed to become active partners with government to help resident identify, evaluate, and reduce air pollution and exposure to harmful emissions. The project will establish a Community PM Air Monitoring Program to be integrated into the BVHP Environmental Justice Response Network/IVAN website.	\$	500,000.00	Yes
Greenaction for Health and Environmental Justice 2	This project will serve Kettleman City. The project will provide information and tools to those most impacted by air pollution. Residents will gain a better understanding of air pollution and the ability to report air pollution violations that will help improve their air quality. This project seeks to provide comprehensive engagement and education on AB 617, as well as promote community capacity-building for future involvement on air related issues.	\$	150,000.00	Yes
Groundwork Richmond	This project will serve the Richmond area. The project will set the foundation for open data and open knowledge about air quality in the Richmond populations. The project will address technical gaps in existing air monitoring networks while increasing the capacity of communities to monitor and advocate for themselves.	\$	499,006.00	Yes
Hopland Band of Pomo Indians	This project will serve Hopland. The project will include outreach and education to 22 Pomo tribes in Sonoma, Lake and Mendocino Counties. This project would survey residents' homes to identify wood stoves, black mold, leaks and excess moisture in order to target those most impacted by poor air quality. An integral component of this project will be providing personalized support to the community regarding air quality.	\$	50,000.00	Yes
Idle-Free California Inc.	This project will serve Sacramento County area. The project will aim to focus campaigns with over 30 schools on light-duty vehicle idling by parents by providing them with idle reduction education.	\$	25,000.00	Yes
La Union Hace la Fuerza	This project will serve the Salton Sea area. The project will focus on outreaching to the residents regarding previous air filtration systems in their homes as well as to potential new residents to add these systems in their homes. The project will also provide education to the community, which would assist them with their environmental needs and related health impacts.	\$	500,000.00	Yes
Leadership Counsel for Justice and Accountability, a project of the Tides Center	This project will serve various areas in San Joaquin Valley and Riverside County. This project will focus on increasing participation of under-represented and over-burdened communities in implementation of each component of AB 617, including data gathering, data analysis, air monitoring, emission reduction plan development and implementation, and development of statewide tools.	\$	150,000.00	Yes
Legacy LA Youth Development Corporation	This project will serve the Ramona Gardens, Boyle Heights/Los Angeles area. This project will develop air pollution reduction measures to be integrated into the planned natural park at Ramona Gardens housing development to improve air quality, reduce community exposure to criteria air pollutants and improve public health. Furthermore, this project will further the development of community partnerships and collaborations.	\$	387,189.00	Yes
Madera Coalition for Community Justice	This project will serve Madera. The aim of the project is to harness the collective vision, energy, and talent of community members and to parlay those expressions in ways that are collaborative and constructive to combat air pollution. This project offers multi-faceted advocacy framework that uses the school, community and the environment as fora for catalyzing new thinking, social action, real-life learning and problem solving relative to air pollution.	\$	23,189.00	Yes
Pacific Asian Consortium in Employment	This project will serve the Los Angeles County area. The project will focus on outreach and education, to provide in-language information about AB 617, while increasing participants' capacity to become active partners in identifying, evaluating and reducing air pollution and exposure to harmful emissions in their communities. The project also hopes to leverage staffing and resources to existing programs (Low-Income Home Energy Assistance Program, Weatherization Assistance Program, and Energy Savings Program).	\$	50,000.00	Yes
Pala Band of Mission Indians	This project will serve the Pala Reservation. The project will develop a network of low-cost air quality monitors linked with a website open to the tribal communities to provide real-time air quality data. This project will also build capacity of other underrepresented tribes through the coalition-building and inclusion of future tribal governments in the monitoring network.	\$	281,189.00	Yes

Pesticide Action Network North America	This project will serve the Central Coast and San Joaquin Valley areas. This project will facilitate participation by community members from seven highly polluted agricultural regions and potentially one urban Los Angeles region, while increasing overall capacity to monitor air quality and participate in emissions reduction planning. This project will focus on pesticide toxic air contaminants, which pose a significant health risk to farmworker communities and contribute to the development of criteria air pollutants.	\$	471,437.00	Yes
Physicians for Social Responsibility - Los Angeles	This project will serve the South Central Los Angeles area. The project aims to strengthen the knowledge and capacity of residents, facilitate stakeholder engagement in policy processes and identify and advance preliminary strategies to influence the community emissions reduction plans. The project has five primary objectives: community education and technical training; data visualization and resource development; data research and analysis reporting; community-led reporting and participation; and high-level assessment of best available technology.	\$	500,000.00	Yes
Physicians, Scientists and Engineers for Healthy Energy	This project will serve the Richmond, North Richmond and the San Pablo areas. The project will focus on information gaps, creating a denser network of air quality monitors in the Richmond-San Pablo area. The project would deploy a network of low cost monitors that will provide information needed to support the efforts of regional and state air regulators and community organizations to improve air quality.	\$	500,000.00	Yes
reDiscover Center	This project will serve the Del Rey and Los Angeles areas. This project aims to give citizens accurate, real-time information about the air they breathe and teach technical skills to local students and community groups. The project aims to teach residents about gases that affect air quality and the regulatory agencies in charge of them, then to build gas sensors and shelters and install them indoors in their homes, businesses or schools, then to create a website with interactive charts with historical data as well as visualizations.	\$	288,324.00	Yes
Rose Foundation for Communities and the Environment	This project will serve the Oakland area. The "Just Breathing" project will increase participation in AB 617 implementation among Oakland youth, along with their families, friends and other community members. The project seeks to bring youth and community perspectives into the community air protection planning process and aims to build a genuine partnership process, by engaging youth and community members along with agencies and local government in improving air quality.	\$	149,915.00	Yes
Self Help Graphics and Art	This project will serve the Boyle Heights/Los Angeles area. The project will provide the community with education on environmental issues, like air quality, development of public health surveys on needs and opinions regarding environmental issues, and information and enrollment assistance to programs that make clean energy technologies more affordable and accessible, such as CARB's Clean Vehicle Rebate Program (CVRP).	\$	43,550.00	Yes
Social & Environmental Entrepreneurs	This project will serve the Community of Wilmington, Los Angeles Harbor and Los Angeles region. The project aims to establish a low-cost PM-VOC-methane air quality monitoring station network pilot. The project also aims to partner with two other environmental justice communities to begin initial steps in learning about simple and complex scientific community-based air quality monitoring and illustrate the flexibility in their network expansion concept.	\$	500,000.00	Yes
Social and Environmental Entrepreneurs 2	This project will serve Stanislaus County. This project will focus on reaching out to communities, providing them with educational information, learning from the residents' experiences, developing networks and organizing infrastructures. Furthermore, it will focus on assisting in the navigation of pertinent regulatory agencies and developing actions that will lead to the improvement of air quality.	\$	49,828.00	Yes
Special Service for Groups, Inc. (SSG)	This project will serve Alhambra and Monterey Park areas. The project aims to educate, engage, and empower Alhambra and Monterey Park residents to advocated for policy change that will lower levels of PM 2.5 and its health impacts. The project would focus on guiding local residents to collect their own PM 2.5 data, develop air quality priorities for their communities using that data, and organize the community at large to campaign for improved air quality at the local level.	\$	301,755.00	Yes
The Regents of the University of California, Davis	This project will serve the Sacramento area. The project will focus on the upcoming Air Sensors International Conference (ASIC), to provide travel to the conference for the community members who would like to attend. Furthermore the project will aim to educate community members on new air sensor technologies.	\$	50,000.00	Yes
The Regents of the University of California, on behalf of its Riverside campus	This project will serve the Riverside area. The project will develop and deploy sustained community involvement strategies in disadvantaged areas and conduct a series of measurement campaigns to identify neighborhood level information on diesel toxic PM levels in and around growing diesel-fueled goods movement operations.	\$	500,000.00	Yes

Tree Fresno	This project will serve the Fresno area. The project will focus on comparing near-round pollution levels at locations with and without vegetative barriers, and will help build capacity within EJ communities to make informed tree planting and urban forestry decisions to protect against pollution exposure, sequester carbon, and beautify the community.	\$	499,236.00	Yes
Twenty-Nine Palms Band of Mission Indians	This project will serve the Coachella area. The project will aim to collect baseline ambient air quality data, the tribe will be able to observe the impacts of the Quantification Settlement Agreement in real-time, and keep the community informed of unsafe air days. This project will focus on creating a tribal air monitoring program.	\$	395,386.00	Yes
Vallejo - St. Vincent's Hill Neighborhood Coalition	This project will serve Vallejo. The project aims to acquire PM data and total volatile organic compound (VOCs) data with higher spatial resolution, thus allowing the community to have more information to take appropriate steps to protect their health. This project focuses on technical and participatory aspects of the AB 617 efforts; it will focus on identifying and evaluating air toxics, both mobile and stationary.	\$	392,443.00	Yes
West Oakland Environmental Indicators Project	This project will serve the West Oakland area. The project will aim to establish a community-operated portal and air monitoring network. The project aims to build community awareness on air quality issues and create an online portal with detailed local air quality information.	\$	499,712.00	Yes
West Oakland Environmental Indicators Project	This project will serve the Oakland area. The project will aim to launch a coalition led by community-based environmental justice organizations based in parts of the Bay Area with significant and well-documented air pollution levels. The project will aim to connect members to share AB 617-related information, build member capacity and engage AB 617 agencies on program and policy decisions.	\$	149,775.00	Yes
