

**FORM 15 - Application for a Portable Storage Silo Registration**

<b>1. Company Name:</b>	
<b>2. Equipment Manufacturer:</b>	<b>3. Model:</b>
<b>4. Type of Materials Processed:</b> <input type="checkbox"/> Cement <input type="checkbox"/> Bentonite <input type="checkbox"/> Fly Ash <input type="checkbox"/> Barium Sulfate <input type="checkbox"/> Lime <input type="checkbox"/> Silica Fume	<b>5. Serial Number:</b>
	<b>6. Company Unit ID (optional):</b>
<b>7. Maximum Throughput Rating:</b> cubic yards/hr	
<b>8. Emission Control Method:</b> <input type="checkbox"/> Silo Vent Filter <input type="checkbox"/> Cartridge Filter <input type="checkbox"/> Fabric Dust Collector	
<b>Control Efficiency:</b> <i>Attach Manufacturer's Specifications or Engineering Data Which Demonstrates a Minimum Particulate Matter Control of 99 Percent For Dust Collection Equipment.</i>  Is Fabric Dust Collection Equipped with Operational Pressure Differential Gauges? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A (no fabric collectors)	
<b>9. Home District Designation:</b>	

## Form 15 Instructions

1. *Company Name* - Legal name of entity, business, organization, agency, or private individual that operates the equipment.
2. *Equipment Manufacturer* - For example: Simons, Rexnord, or your company name if built in-house.
3. *Model* - May be a series of numbers or letters or combinations of numbers and letter. For example: 3612.
4. *Types of Material Processed* - Provide the type of material stored in the silo. For fire retardant, provide the Material Safety Data sheet.
5. *Serial Number* - A unique, unit specific number, usually on the equipment nameplate. The serial number is necessary to ensure that each piece of registered equipment can be uniquely identified and matched to its respective registration certificate number.
6. *Company Unit ID (Optional)* - This is your own number or name you use to identify or track the equipment.
7. *Maximum Throughput Rating* - Provide the maximum throughput rating.
8. *Emission Control Method*- Provide the type of control method used and include a spec sheet demonstrating 99 percent dust emission control.  
*Fabric Dust Collectors and Operational Pressure Differential Gauge* - Fabric dust collectors must be equipped with an operational pressure differential gauge to measure the pressure drop across the filters. If you do not have a pressure gauge, explain how filters are monitored. If fabric collectors are not used, indicate N/A. Include manufacturer's specifications or engineering data showing that dust collection equipment controls particulate emissions to 99 percent.
9. *Home District Designation* - Indicate the one air pollution control or air quality management district in which this equipment will operate most of the time. A home district is required for each unit. To determine home district by location, go to <http://www.arb.ca.gov/app/dislookup/dislookup.php>.

*Please note that under the California Public Records Act (Gov. Code, § 6250 et seq.), your submissions, including associated contact information (e.g., your address, phone, email, etc.) become public records and may be released to the public upon request. Personal information will be protected from disclosure as required by law, including under the Information Protection Act. (Cal. Civ. Code, § 1798, et seq.) Information that is claimed to be confidential should be submitted as provided in CARB's regulations for submitting confidential data, California Code of Regulations, title 17, section 91011.*
