

FORM 16 - Application for a Portable Miscellaneous Equipment Registration

1. Company Name:			
2. Equipment Unit Type:			
3. Equipment Listing: <i>Include the manufacturer, model, and serial number of the plant. This information may be for the plant as a unit or it may be necessary to list individual components. If inadequate space is provided, please attach listing.</i>			
Is the unit self-propelled or on tracks? Yes <input type="checkbox"/> No <input type="checkbox"/> <i>If yes, then the engine propelling the equipment is not eligible for registration in the Portable Equipment Registration Program but may need to be reported in the Off-Road Diesel (DOORS) Program.</i>			Company Unit ID (Optional):
Component Type	Manufacturer	Model	Serial Number
4. Maximum Throughput Rating: tons/hr			
5. Indicate equipment use. Include all possible operating scenarios:			
6. Provide a Material Flow Chart. <i>Provide a material flow chart for a maximum throughput scenario showing all the components of the plant in operational configuration. Include throughput quantities for all branches.</i>			
7. Indicate types of materials processed:			
8. Indicate method and efficiency of particulate emission control for transfer points: <input type="checkbox"/> Water Sprays <input type="checkbox"/> Onsite Water Truck <input type="checkbox"/> Bag House/Dust Collector <input type="checkbox"/> Other			
9. Indicate method and efficiency of particulate emission control for any crushers: <input type="checkbox"/> Water Sprays <input type="checkbox"/> Onsite Water Truck <input type="checkbox"/> Bag House/Dust Collector <input type="checkbox"/> Other			
10. Are fabric dust collectors equipped with operational pressure differential gauges? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A (No Fabric Collectors) <i>If applicable, provide specifications or engineering data to demonstrate a minimum particulate matter control of 99 percent for dust collection equipment.</i>			
11. Home District Designation (Required):			

Note: Engines that power mobile, or self-propelled equipment, may not be registered in the Portable Equipment Registration Program. For information about off-road diesel vehicles or to enter a vehicle into the DOORS program, go to <https://www.arb.ca.gov/msprog/ordiesel/ordiesel.htm>

1. *Company Name* - Legal name of entity, business, organization, agency, or private individual that operates the equipment.
2. *Equipment Unit Type* – List the type of equipment being registered.
3. *Equipment Listing* - List information regarding the major components of equipment. Attach extra pages if needed. If the plant is considered a single, composite unit and can be identified by manufacturer, model number, and serial number, which includes all of the components, list the information for the plant. If the plant is composed of individual components, list the type, manufacturer, model, and serial number for each component. Indicate if the unit is self-propelled or on tracks. For each piece, please provide all of the following:
Component Type - Describe the equipment or component, such as “crusher” or “screen.”
Manufacturer - For example: Simons, Rexnord, or your company name if built in-house.
Model - May be a series of numbers or letters or combinations of numbers and letter.
Serial Number - A unique, unit specific number, usually on the equipment nameplate.
Company Unit ID (Optional) - For your reference. Enter your company unit or equipment number.
4. *Maximum Throughput Rating* - Indicate the maximum rated throughput in tons per hour.
5. *Equipment Use Including All Operating Scenarios* - Explain how equipment is used, such as “crushing of rock in the manufacture of aggregate.” Include multiple uses or operating scenarios.
6. *Material Flow Chart* - List multiple pieces such as conveyors, crushers, and screens.
7. *Types of Materials Processed* - List all types of rock, aggregate, or other materials processed.
8. *Transfer Points* - Describe and list the transfer points identified in the site plan or flow charts required in item 5 above. Specify the method and efficiency of particulate control for each transfer. Transfer points include crushers, screens, conveyors, stockpiles, truck loading, etc.
9. *Crushers* - Describe and list all crushers identified in the site plan or flow charts as required in item 5 above. Include the method and efficiency of particulate control for each transfer point.
10. *Fabric Dust Collectors and Operational Pressure Differential Gauge* - Fabric dust collectors must be equipped with an operational pressure differential gauge to measure the pressure drop across the filters. If you do not have a pressure gauge, explain how filters are monitored. If fabric collectors are not used, indicate N/A. Include manufacturer’s specifications or engineering data showing that dust collection equipment controls particulate emissions to 99 percent.
11. *Home District Designation (Required)* - Indicate the one air pollution control district or air quality management district in which this equipment will operate most of the time. A home district is required for each unit. To determine home district by location, go to <http://www.arb.ca.gov/app/dislookup/dislookup.php>.

Please note that under the California Public Records Act (Gov. Code, § 6250 et seq.), your submissions, including associated contact information (e.g., your address, phone, email, etc.) become public records and may be released to the public upon request. Personal information will

be protected from disclosure as required by law, including under the Information Protection Act. (Cal. Civ. Code, § 1798, et seq.) Information that is claimed to be confidential should be submitted as provided in CARB's regulations for submitting confidential data, California Code of Regulations, title 17, section 91011.
