## FORM 9 - Application for a Portable Confined Abrasive Blasting Registration

1. Company Name:	
2. Equipment Manufacturer:	3. Model:
4. Nozzle Diameter (indicate one):	5. Serial Number:
Inches: or gauge:	6. Company Unit ID (Optional):
Operating Pressure: psi	
7. Abrasives Used	
☐ Aluminum Oxide	☐ Silicon Carbide
☐ Mineral Slag	☐ Glass Bead
☐ Steel Grit	☐ Steel Shot
☐ Black Beauty	☐ Walnut Shell
☐ Plastic Shot	□ Sand
☐ Garnet	☐ Other:
8. Control Equipment Information	
Type of Filters: □Fabric □ Cartridge	
Control Efficiency: %	
Attach manufacturer's specifications or engineering data that demonstrates a minimum particulate matter control of 99 percent for dust collection equipment.	
Are fabric dust collectors equipped with operational pressure differential gauges?	
□Yes □ No □ N/A (No Fabric Collectors)	
9. Home District Designation:	

## Form 9 Instructions

- 1. *Company Name -* Legal name of entity, business, organization, agency or private individual that operates equipment.
- 2. *Manufacturer* For example: Simons, Rexnard, or your company name if built in-house.
- 3. *Model* May be a series of numbers or letters or combinations of numbers and letters. For example: 3612.
- 4. *Nozzle Diameter and Pressure* Enter the nozzle diameter in inches or nozzle gauge and the operating pressure at the nozzle in pounds per square inch (psi).
- 5. Serial Number A unique, unit specific number, usually on the equipment nameplate. The serial number is necessary to ensure that each piece of registered equipment can be uniquely identified and matched to its respective registration certificate number.
- 6. Company Unit ID (Optional) This is your own number or name you use to identify or track the equipment.
- 7. Abrasives Used A list of the types of abrasives used. If "Other" is indicated, the type must be listed. Note: All abrasives must be California Air Resources Board certified.
- 8. Control Equipment Information Particulate control equipment must be listed and described.
  - Control Efficiencies List control efficiencies as a percentage of particulate controlled. Operational Pressure Differential Gauge - Fabric dust collectors must be equipped with an operational pressure differential gauge to measure the pressure drop across the filters. If you do not have a pressure gauge, explain how filters are monitored. If fabric collectors are not used, indicate N/A. Vent filters do not require pressure gauges.
- 9. Home District Designation Indicate the one air pollution control or air quality management district in which this equipment unit will operate most of the time. A home district is required for each unit. To determine home district by location, go to <a href="http://www.arb.ca.gov/app/dislookup/dislookup.php">http://www.arb.ca.gov/app/dislookup/dislookup.php</a>.

Please note that under the California Public Records Act (Gov. Code, § 6250 et seq.), your submissions, including associated contact information (e.g., your address, phone, email, etc.) become public records and may be released to the public upon request. Personal information will be protected from disclosure as required by law, including under the Information Protection Act. (Cal. Civ. Code, § 1798, et seq.) Information that is claimed to be confidential should be submitted as provided in CARB's regulations for submitting confidential data, California Code of Regulations, title 17, section 91011.
