

AB 617 Consultation Group

Status of Other AB 617 Elements

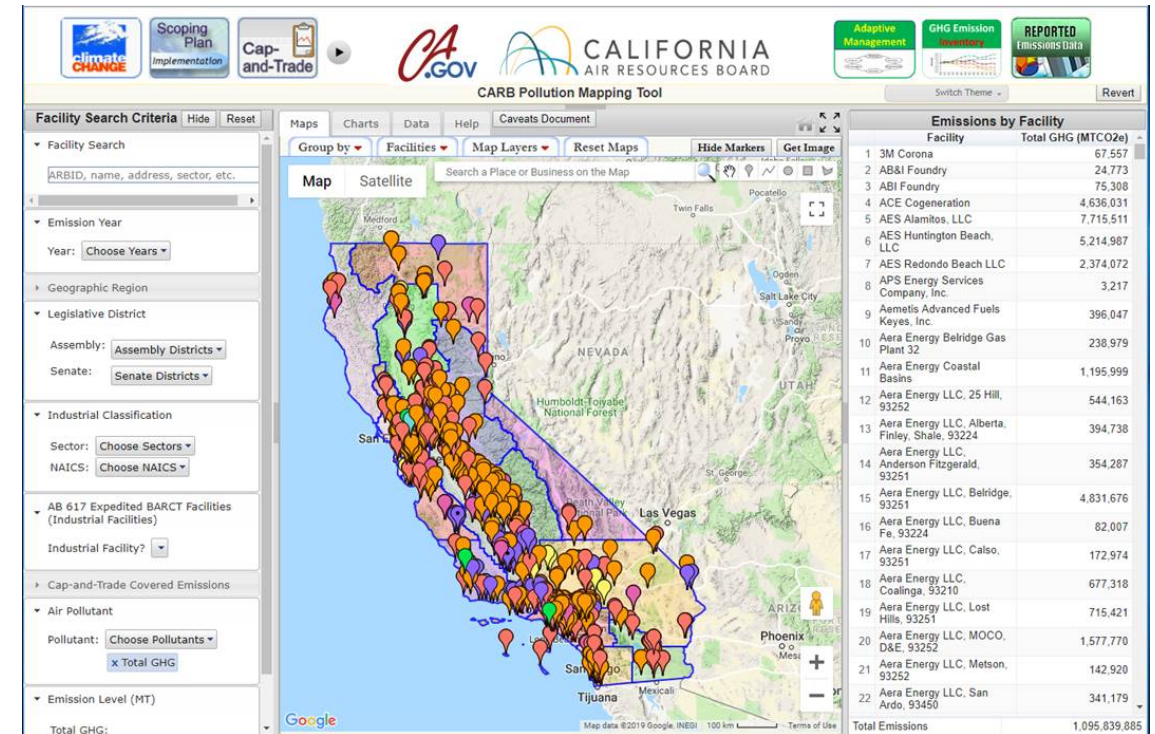

April 4, 2019

Expedited BARCT Schedules

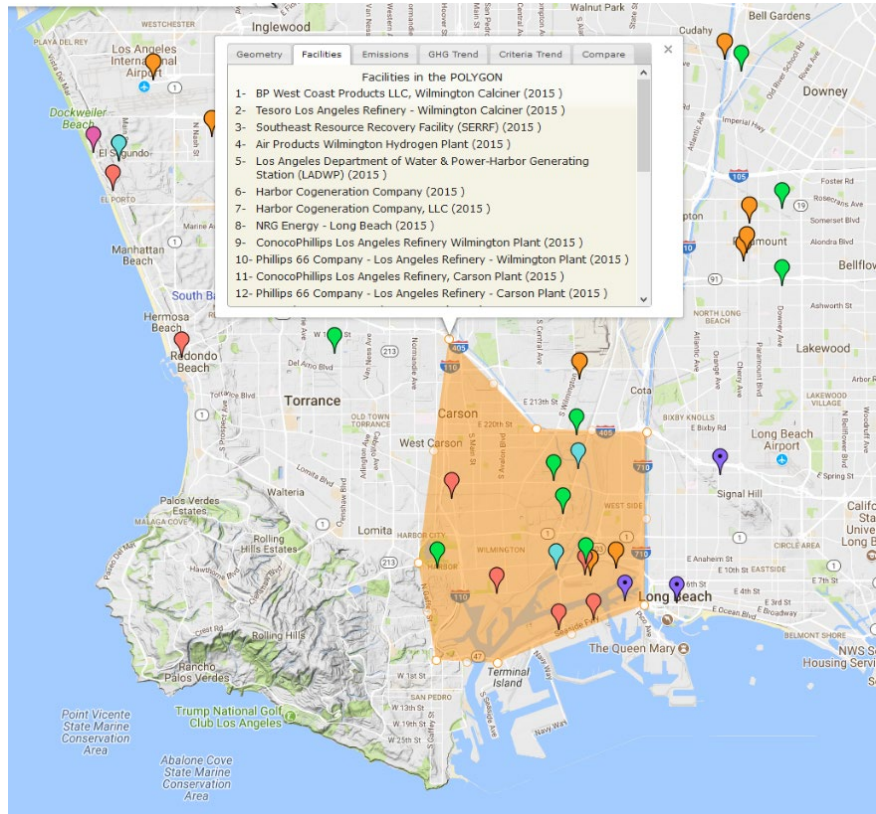

- Districts adopt expedited schedules for BARCT by January, 2019
- Schedules to be implemented by December 2023
- Applicability:
 - 'Industrial sources' subject to the Cap-and-Trade Program as of January 1, 2017;
 - AND is a non-attainment area for one or more air pollutants;
 - AND has permitted units that have *not* implemented BARCT due to a permit revision or a new permit issuance since 2007.

- More info: California Health & Safety Code 40920.6(c) & (d)

Emissions Reporting Regulation

- Establishes annual emissions reporting requirements for stationary sources
- Includes criteria pollutants and air toxics
- Adopted by CARB Board in December 2018
- Developing modifications for expanded scope following Board direction

Emissions Reporting Elements

- Establishes applicability thresholds and timing for reporting data
- Allows for collection of other relevant facility-level data
- Provides options for data certification or verification

Overview of Applicability Requirements

- Proposed applicability based on statewide criteria pollutant emissions and sector-specific toxics requirements
 - Limited to permitted sources
- Criteria pollutant threshold
 - Must report annually if individual permitted criteria pollutants > 4 tons per year
- Toxic pollutant thresholds
 - Certain permitted industry sectors required to report regardless of emissions, such as metal plating and hazardous waste facilities
 - Other permitted sectors must report if sector throughout or use threshold is exceeded, such as gallons of diesel fuel consumed

Increased Enforcement Penalty Provisions

- AB 617 increased penalties from \$1,000 to \$5,000 per violation per day
- Applies to wide variety of violations
 - Stationary sources
 - Greenhouse Gas violations
 - Air Toxics Control Measures
- Previous legislation increased mobile source penalties
- Penalties annually adjust based on Consumer Price Index
