SIGNATURE

I understand that facilities will be awarded a Demonstration Site Grant based on criteria established by participating Local Air Districts and California Air Resources Board (CARB), that priority will be given to facilities that are switching from Perc and converting to a 100% non-toxic, non-smog forming facility, and awards maybe limited by funding availability.

I hereby certify that I have read and understood the information presented in the Facility Demonstration Site Guidelines, and agree to follow the requirements stipulated in the guidelines.

I further certify that the information contained herein is true and correct and understand that it may be subject to release under the California Public Records Act.

I agree that, for a two-year period after receiving the demonstration grant, I will:

- Demonstrate my non-toxic, non-smog forming technology to prospective dry cleaning facility owners,
- Be available to respond to questions from prospective dry cleaning facility owners
- Work with CARB and/or district staff to conduct workshops at my facility
- Be available, as a consultant, to prospective dry cleaning facility owners
- Allow CARB and local districts to make public my facility contact information
- Require any new owner to carry all grant award obligations and provisions if facility ownership change should occur, and
- Respond to any CARB surveys regarding my experiences using the approved cleaning system.

INFORMATION

For more information about AB998, please contact dryclean@arb.ca.gov.

Assembly Bill 998 (AB 998) established the Non-Toxic Dry Cleaning Incentive Program to provide financial assistance to the dry cleaning industry to switch from systems using perchloroethylene (Perc), an identified toxic air contaminant and potential human carcinogen, to non-toxic and non-smog forming alternatives. The AB998 Grant Program provides \$10,000 grants to any eligible dry cleaners in the state that is willing to transition from the use of Perc machines to alternative non-toxic and non-smog forming technologies such as water-based and CO2 cleaning systems.
