Outreach Comments Received on Question Posters  
January 16, 2020

**Question 1:**

**What do you want CARB's Board to know about  
the Community Emissions Reduction Plan?**

Community Steering Committee responses in yellow post-it notes, and  
members of the public responses in non-yellow post-it notes.

# Por favor ponga

1) Over-reliance on incentives, need stronger focus on regulations and enforcement.

2) Need consistent decision making from CARB, AQMD & local governments

3) AQMD staff has been very good with community steering committee members, and I appreciate when Board members attend

Much of the CERP is focused on emissions coming from industry and commerce in and around the 617 community. But ~~the~~ is problem identification and solution options exercises have overlooked emissions generated by community residents and business. For example light duty vehicle emissions are not mentioned in the CERP. How can we incorporate ZEV and charging stations? How can we upgrade our gas stations to fueling stations that give a wide-range of alternative fuel choices?

#1  
Trucks/Ships clearly identified as largest source of pollution yet most of our focus seemed to be on our local refineries

Keep into consideration that the WCLB CERP was developed based on a 12yr old MATES.

on incentives, focus on regulation

decision making & local

has very strong

Emission Reduction plan is great as it benefits the community. However one thing to consider is to have the most up to date data as we are trying to make sure our feedback and data can address the current data and not data that is 12 years old

Need to make sure any strategies set during the CSC is implemented such as Postings of <sup>who</sup> ~~where~~ to call when trucks are idling - that is an easy to do but yet it hasn't been done.

s focused on industry and the G17 problem & options

(1) CARB Governing board  
to know about CERP?

a. That there is an ACTUAL  
ACTION vs the plan.  
- That it is not just a  
PLAN but a DECENT  
GENUINE ~~AND~~ IMPLEMENTATION  
OF AIR POLLUTION  
MONITORING AND REDUCTION  
OF PARTICULATE MATTER

Difficult to assess how  
effective CERP is with out  
details But -

Key issue is how much of

Difficult to assess how  
effective CERP is with out  
details But -

Key issue is how much of  
PLAN implementation is  
enforcement/mitigation vs,  
implementation of reduced/zero emission tech.

Enforcement/mitigation is important but  
mainly addresses ~~existing~~ existing problems.

Implementation of low emission technology  
is key to long term emissions relief.

~~WANT~~ WANT to help foster environment  
for zero emitting technologies to  
succeed and become ~~mainstream~~  
PART OF MAINSTREAM ECONOMY

January 16, 2020

For the first time I felt that my contribution & time was taking in consideration. What a wonderful surprise, my idea about air filters in schools & homes is finally ~~head~~ way through. It is the beginning of the <sup>2nd</sup> year and first meeting ~~end to~~ of the year, now I feel that my community has a voice and AQMD is paying attention to our requests. We still have a long way to go to achieve our goal, free of pollution.

Since we are on the first stage

rather than putting filters on schools would be reduction

of the CERP and still on determining what & how will be more effective to mitigate pollution, can not ~~say~~ <sup>say</sup> much but that all the proposed ideas & what are part of the plan & needs to show how & short ~~are~~ impacts -  
Over all - We are on the right track.

Need a concrete timeline  
to improve the Rule 1148-2  
data base.

Action 2 on Se-6, but  
no time line or dates given specifically  
to improve the quality of data in  
the data base (i.e. misspellings &  
missing chemical CAS #s & information)

- Some suggestions for  
the CERP were not  
implemented in the  
CERP until the final  
month or 2.

- Recommend <sup>putting</sup> moving  
it into the CERP  
earlier in the process,  
or not incorporating  
it, so that alternatives  
& other ideas can  
be looked ~~at~~ at.

A handwritten note on lined paper with a small drawing of a globe at the top center. The text is written in cursive and discusses the importance of taking action for future generations.

It is ~~the~~ time to take action and start to move forward in our growth. Lets make a difference for our future generations. We were put on this path to leave a legacy behind for future generations to look back on. Know you and your role is important. Leave a legacy behind. and let's change and reduce emissions together.

- Flavio Mercades.

A handwritten note on lined paper listing various outreach locations. The text is written in cursive and includes a list of places and a concluding sentence about their effectiveness.

- Improved outreach to local community:

- schools
- parks
- libraries
- local clubs

are all effective partners for disseminating info

- Sometimes the presentations by AQMD were many slides & graphs that took up a lot of time.

- Recommend presentations that are not so lengthy but short & to the point for discussions.

b. LESSONS: (1) That we need to <sup>be</sup> upfront with the actual problems in our communities

(2) LESSONS concerning air pollution.

2. Ways of finding out "leakage" and ~~how~~ <sup>how</sup> to monitor air pollution

3. To face the stakeholders on the table (especially talking to the refineries, industries and to AQMD + <sup>CARB</sup> ~~and~~ <sup>and</sup> ~~about~~ <sup>about</sup> the problems in our community.

Q2 Themes

WCLNB 1/16/20

- Importance of having better data
- Share info upfront → common understanding
- Getting started early (including tours)
- Community input into agendas
- Lots of material - need for focus, <sup>different/more</sup> accessible materials, way to ask Qs
- Importance of facilitation
- Additional outreach (e.g. to schools)
- Importance of implementation - need metrics to track ongoing progress
