

Updates for Mobile Source Certification and Compliance Fees Workshops

Updates For November, 2019 Workshops

This notice is to provide stakeholders with updates to the material presented at the CARB Mobile Source Certification and Compliance Fee workshops held on November 21st and 22nd. The due date for comments has been extended to January 6, 2020 and updated information has been posted at the webpage below.

[More Information](#)

Updates

The following items have been posted:

- Updates to slides 17 and 18 on the On-Road Mobile Source Certification and Compliance Fee Workshop held on November 22, 2019.
 - Slide 17: The 2018 and 2022 heavy-duty Executive Order numbers, new 2022 average cost, and T/P/N series numbers updated.
 - Slide 18: The “On-Road Fee Total” cost for HD and MC updated.

Comments

CARB requests comments on the fee concepts proposed and business information by January 6, 2020.

Concepts

CARB is in the process of evaluating each concept presented to develop the fee. Currently, CARB staff are focusing on the “Application Fee Concept” as the best fit for most EO series, with the caveats presented at the workshops. Please provide comments on this strategy or provide alternatives for CARB to evaluate. Please provide business information or other data to support your alternative strategy.

Business Information

CARB is conducting a formal economic review process called “Standardized Regulatory Impact Assessment” or SRIA and needs business information outlined on the SRIA titled slides. The "small business" definition used for the SRIA can be found in Government Code section 11346.3, subdivision (b)(4)(B) which states: (B) For the exclusive purpose of undertaking the economic impact assessment, a “small business” means a business that is all of the following:

- (i) Independently owned and operated.
- (ii) Not dominant in its field of operation.
- (iii) Has fewer than 100 employees.

If you would like to discuss CARB’s costs, share sensitive business economic or sales data, or coordinate a meeting to discuss alternatives, please contact [Kathleen Mead](#) at (916) 324-9550.

Please send all comments to [Kathleen Mead](#) by January 6, 2020. Also, please provide a copy to [Jackie Lourenco](#) and your series contact listed below.

<u>EO Series</u>	<u>Contact</u>
A (LD), M, U-M, U-N, U-G	Steven Hada
A (HD), U-R	James Pang
U-L, U-U, U-W	Byron Ng
Q, RM, G	Christopher Dilbeck
B, C, D	Sidd Futaba
AB and DE (stationary, locomotive, TRU)	David Quiros
DE (on-road, off-road, APU)	Shawn Daley
