

Community Recommendations

AB 617 Consultation Group Meeting

July 31, 2018

Community Selection Process

1

Identification of Potential Communities

2

Assessment of Exposure Burdens

3

Selection of Initial Communities

- Expect up to 10 communities in first year of program
- Reflect variety of regions and pollution sources
- Serve as models for other communities

Community Identification

Community self-nominations

- Community members and groups
- Over 100 nominations received so far

Dots represent cities/areas that contain one or more communities nominated by community members

Community Identification

Air District recommendations

- Initial: April 30, 2018
- Over 400 initial communities recognized

Dots represent cities/areas that contain one or more communities recommended by air districts

Assessment of Communities

- Preliminary Table of Metrics
 - Provided for all census tracts in the State as well as aggregated to community/city level
 - Included air quality, emissions, health, and socio-economic factors
- Additional community-level assessments by air districts and community groups

Considerations in Selecting Communities

- Mix of communities reflecting different regions, sources, and size
- Identify actions to benefit all nominated communities
- CARB will post recommendations on August 24th for Board consideration
