

## APPENDIX G.

# CALIFORNIA ENVIRONMENTAL QUALITY ACT – ENVIRONMENTAL ANALYSIS

A Draft Environmental Analysis was released as Appendix G in the *Draft Community Air Protection Blueprint for Selecting Communities, Preparing Community Emissions Reduction Programs, Identifying Statewide Strategies, and Conducting Community Air Monitoring*<sup>1</sup> on June 7, 2018 for a 45-day comment period, which ended on July 23, 2018. The Draft Environmental Analysis will not be recirculated for an additional comment period as the edits made to this Blueprint and Final Environmental Analysis do not include significant new information that would require recirculation of the Draft Environmental Analysis, pursuant to California Code of Regulations, title 14, Section 15088.5.

The Environmental Analysis for the Community Air Protection Program (Program) is intended to disclose potential environmental impacts and identify potential mitigation specific to the Program. In some cases, as described in Chapter 4 of the Draft Environmental Analysis, potentially significant environmental effects may occur as a result of compliance actions taken in response to the Program. Mitigation measures are described in the Final Environmental Analysis that could be expected to reduce potentially significant impacts to less-than-significant levels, for individual projects, if agencies with discretionary authority adopt the mitigation measures. The Final Environmental Analysis takes the conservative approach in its post-mitigation significance conclusions (i.e., tending to overstate the risk that feasible mitigation may not be sufficient or may not be implemented by other parties) and discloses, for purposes of compliance with the California Environmental Quality Act, that potentially significant environmental impacts may be unavoidable.

The Final Environmental Analysis is provided as a stand-alone document for the Program, and will be located on CARB's webpage at: <https://ww2.arb.ca.gov/our-work/programs/Community-Air-Protection-Program-AB617>.
