

**State of California
AIR RESOURCES BOARD**

EXECUTIVE ORDER RM-17-002

Spark-Ignition Marine Watercraft Evaporative Emissions System Components

**Moeller Marine Products
Fuel Tank**

WHEREAS, pursuant to California Health and Safety Code, sections 39600, 39601, and 43013, the California Air Resources Board (ARB) has established a certification process for evaporative emissions system components designed to control gasoline emissions from spark-ignition marine watercraft (SIMW), as described in California Code of Regulations, title 13, section 2856;

WHEREAS, pursuant to California Health and Safety Code, section 43013, ARB has established criteria and test procedures for determining the compliance of evaporative emissions system components with the design requirements in Cal. Code Regs., title 13, section 2855;

WHEREAS, pursuant to Cal. Code Regs., title 13, section 2856, ARB Executive Officer may issue an executive order (EO) if he or she determines that SIMW evaporative emissions system components conform to the applicable performance requirements set forth in Cal. Code Regs., title 13, section 2855; and

WHEREAS, pursuant to California Health and Safety Code, sections 39515 and 39516, ARB Executive Officer issued EO G-17-006 delegating to the Chief of ARB Monitoring and Laboratory Division (MLD) the authority to certify SIMW evaporative system components.

NOW, THEREFORE, I, Michael T. Benjamin, Chief of MLD, find that the Moeller Marine Products fuel tank representative model, FTA001191BR, conforms with the 0.7 grams/meter²/day permeation performance requirements set forth in Cal. Code Regs., title 13, section 2855, when tested at a constant temperature of 28°C pursuant to test procedure TP-1504 using an approved test fuel of CE10.

IT IS ORDERED AND RESOLVED that the Moeller Marine Products fuel tank models listed in Table 1 with 0.200" minimum wall thickness are certified for use in SIMW introduced into commerce in California.

Table 1

Models and Specifications for Moeller Marine Products Fuel Tank			
Fuel Tank Model Number	Minimum Wall Thickness, (in)	Minimum Volume/Internal Surface Area Ratio (in ³ / in ²)	Test Emission Rate (grams/meter ² /day)
FTA00191BR*	0.200 +/- 0.060	1.98	0.67

*Manufacturer-designated representative for the fuel tank family

IT IS FURTHER ORDERED that Moeller Marine Products shall provide a warranty to watercraft manufacturers purchasing any of the Moeller Marine Products fuel tank models listed in Table 1. The warranty must conform to the requirements of Cal. Code Regs., title 13, section 2861.

IT IS FURTHER ORDERED that the certified Moeller Marine Products fuel tank models listed in Table 1 shall be installed in accordance with the manufacturer's installation and use instructions for the Moeller Marine Products fuel tank models. A copy of this EO and fuel tank installation and use instructions shall be provided to original watercraft manufacturers purchasing Moeller Marine Products fuel tank models listed in Table 1 for installation on spark-ignition marine engines and watercraft introduced into commerce in California.

IT IS FURTHER ORDERED that the Moeller Marine Products fuel tank models listed in Table 1 and introduced into commerce in California shall be clearly identified by a permanent identification.

IT IS FURTHER ORDERED that any alteration to the Moeller Marine Products fuel tank models listed in Table 1 and certified hereby is prohibited. Any alteration or modification of the designs approved by this EO will require the manufacturer to apply for a new EO.

IT IS FURTHER ORDERED that the Moeller Marine Products fuel tank models listed in Table 1 shall be compatible with fuels in common use in California at the time of certification, and any modifications to comply with future California fuel requirements shall be approved in writing by the Executive Officer or Executive Officer's delegate.

IT IS FURTHER ORDERED that the component certification of the Moeller Marine Products fuel tank models listed in Table 1 can be referenced in certification applications for spark-ignition marine engines and watercraft that use spark-ignition marine engines unless the Executive Officer finds that the Moeller Marine Products fuel tank models listed in Table 1 no longer meet the performance requirements set forth in Cal. Code Regs., title 13, section 2855, when tested pursuant to Cal. Code Regs., title 13, section 2864.

Executed at Sacramento, California, this 14th day of March 2017.

Dr. Michael T. Benjamin, Chief
Monitoring and Laboratory Division
