

CARB Enforcement Program Partnerships

Todd P. Sax, D.Env.
Chief, Enforcement Division

CARB Enforcement Program Goals

- Ensure programs are effective
- Improved transparency to the public and stakeholders
- Positive interaction with partner agencies

District-Related Enforcement Programs

- Training
- District Support
- Permit and Rule Evaluation & Support
- Stationary Source Enforcement
- MOU Tracking
- Portable Equipment Registration Program (PERP)
- AB 617 – Community Air Protection Program
- Supplemental Environmental Projects (SEPs)

Training

- Promotes understanding of emission control strategies and regulatory requirements; conducts Visible Emission Evaluation certification
- Updated goals:
 - Focus on district needs
 - Leverage technology
 - Maximize available resources
 - Create a more collaborative program
- Training priorities categorized as:
 - Fundamental Enforcement Training
 - CARB Programs
 - Technical

District Support

- Enforce asbestos NESHAP in non-designated areas
- Provide support for District enforcement actions on request
- Conducts outreach to Districts
- Receive and triage complaints
- District Enforcement program reviews
- Federal Enforcement Data Reporting
- Sector-based compliance evaluations

Permit Evaluation & Support

- Review of District permitting actions (Title V, Major Modifications, etc)
- Review of District rules – new, amended, NSR, SB288 anti-backsliding
- Review of ERC issuances
- District permitting program reviews
- Coordination with CAPCOA
- Support for district questions/needs
- Review BACT/BARCT determinations for Clearinghouse
- ERC Cost Report

Stationary Source Enforcement

- Direct enforcement of State Rules
 - Landfill Methane
 - Oil and Gas
 - Renewable Portfolio Standard
 - Refrigeration Management

MOU Tracking

- CARB partners with air districts to enforce GHG regulations
 - Landfills
 - Oil and Gas
 - Refrigerant Management Program
- Landfills – 23 districts (Antelope, Bay Area, Eastern Kern, Feather River, Imperial, Lake, Lassen, Mendocino, Mojave, Monterey, N Coast, N Sierra, Placer, Sac, San Diego, San Joaquin, Santa Barbara, S Coast, SLO, Ventura, Tehama, & Yolo-Solano)
- Oil and Gas – 17 districts (Bay Area, Butte, Colusa, Feather River, Glenn, Lassen, Mojave, Monterey, N Coast, Sac, San Joaquin, SLO, Santa Barbara, S Coast, Tehama, Ventura, and Yolo-Solano)
- RMP – 2 districts currently (Monterey and San Joaquin) with 3 more agreements pending (Sac, S Coast, and Ventura)

Portable Equipment Registration Program

- Local air districts enforce requirements of PERP Regulation and Portable Engine ATCM
- Both regulations were recently amended and present new enforcement challenges (phase-out, fleet size, PSPS, etc.)
- PERP staff are available to discuss regulatory provisions in relation to enforcement
- Submit inspection reports online – contact PERP staff for link

Community Air Protection – AB 617

- Leverage CARB and District resources to enhance enforcement of both stationary and mobile sources
- Work with district staff and the community to develop enforcement strategies to address community concerns
- Provide training to the community on how to recognize and properly report potential violations

Supplemental Environmental Projects

- Develop projects benefitting disadvantaged communities, with a nexus to air quality
- Violators select projects for funding as a condition of settlement
- Districts can be SEP administrators for more complex projects.

How do we accomplish our goals?

- Communication is key going forward
- Form and maintain relationships with local districts
- Conduct outreach to community groups
- Create a collaborative partnership for clean air
