

Fiscal Year 2017-18 Clean Off-Road Equipment Voucher Incentive Project (CORE) Project Summary and List of Applications Received In Response to the Grant Solicitation

Project Summary: The California Air Resources Board (the Board) completed a solicitation for a Grantee to implement the Clean Off-Road Equipment Voucher Incentive Project (CORE). The Fiscal Year 2017-18 Funding Plan for Clean Transportation Incentives, approved by the Board in December 2017, allocated \$40 million in funding for this project to encourage California fleets to purchase or lease currently commercialized zero-emission off-road freight equipment. CORE will provide vouchers for specified types of zero-emission freight equipment on a first-come, first served basis, with increased incentives for equipment located in disadvantaged communities. CORE will accelerate the deployment of cleaner off-road equipment and benefit the citizens of California by providing immediate criteria pollutant and greenhouse gas emission reductions and by supporting California’s long-term air quality and climate change goals.

On the following page is the list of applicants (in alphabetical order) that responded to the CORE solicitation.

List of Applications Received

Applicant	Partner(s)	Proposed Project Implementation Funding	Total Funding
CALSTART 48 North Chestnut Avenue Pasadena, California 91106	TetraTech	\$2,797,967	\$40,000,000
Center for Transportation and the Environment (CTE) 1960A University Avenue Berkeley, California 94704	ZPRYME	\$2,622,225	\$40,000,000
Gas Technology Institute (GTI) 412 F Street Davis, California 95616	Frontier Energy Gladstein, Neandross & Associates	\$2,799,563	\$40,000,000

Solicitation materials can be found at: www.arb.ca.gov/msprog/aqip/solicitations.htm.

The scoring criteria are described in the 2017-2018 Grant Solicitation for the Clean Off-Road Equipment Voucher Incentive Project at:
