Low Carbon Fuel Standard

Application Instructions For

Hydrogen Refueling Infrastructure (HRI) Pathway

Release Date: February 11, 2019

Updated: August 21, 2020

CARB's Low Carbon Fuel Standard regulation, which appears at sections 95480 to 95503 of title 17, California Code of Regulations, is designed to reduce greenhouse gas emissions associated with the life cycle of transportation fuels used in California. Unlike the regulation itself, this user guide does not have the force of law. It is not intended to and cannot establish new mandatory requirements beyond those that are already in the LCFS regulation, nor supplant, replace or amend any of the legal requirements of the regulation. Conversely, any omission or truncation of regulatory requirements does not relieve entities of their legal obligation to fully comply with all requirements of the regulation.

Disclaimer: The California Air Resources Board (CARB) makes every reasonable effort to provide accurate and up-to-date information in this User Guide, but makes no warranties or representations as to the accuracy of the content and assumes no liability or responsibility for any error or omission. CARB reserves the right to make changes to this User Guide and/or to the products described in this User Guide, at any time without notice. We welcome and appreciate your feedback. Please send in your comments and suggestions, particularly if information in this guidance appears incorrect, misleading, or incomplete.

Acronyms

CARB	California Air Resources Board
CBTS	Credit Bank & Transfer System
CI	Carbon Intensity
DMS	LCFS Data Management System
EV	Electric Vehicle
FEIN	Federal Employer Identification Number
FPC	Fuel Pathway Code
FSE	Fueling Supply Equipment
HRI	Hydrogen Refueling Infrastructure
LCFS	Low Carbon Fuels Standard
LRT	LCFS Reporting Tool
ZEV	Zero Emission Vehicle

1 Introduction

The 2018 LCFS amendments added a new crediting mechanism to the LCFS designed to support the deployment of zero emission vehicle (ZEV) infrastructure. That new mechanism¹ bases crediting for ZEV infrastructure on a calculation of capacity of the hydrogen station or direct current (DC) fast charging site, less the actual fuel dispensed. The two categories for ZEV infrastructure are Hydrogen Refueling Infrastructure (HRI) and DC Fast Charging Infrastructure (FCI).

This document is a guide to submitting HRI Applications. A similar guide to submitting an FCI Application can be found here: https://www.arb.ca.gov/fuels/lcfs/guidance/fci_userguide.pdf

2 LRT-CBTS Account Registration and Management

Organizations that intend to participate in the LCFS program, including the new ZEV fueling infrastructure crediting provisions, must register for an account in the LCFS Reporting Tool (LRT) for reporting purposes at: <https://ssl.arb.ca.gov/lcfsrt/Login.aspx>.

For assistance with registering for an account, please see the LRT-CBTS User Guide at: https://www.arb.ca.gov/fuels/lcfs/reportingtool/userguide_lrt_cbts_v2_registration_010919.pdf.

3 Application for Hydrogen Refueling Infrastructure

An application template for HRI is available for download here: https://www.arb.ca.gov/fuels/lcfs/guidance/hri_application.xlsm. This section describes how to fill out the application template for HRI.

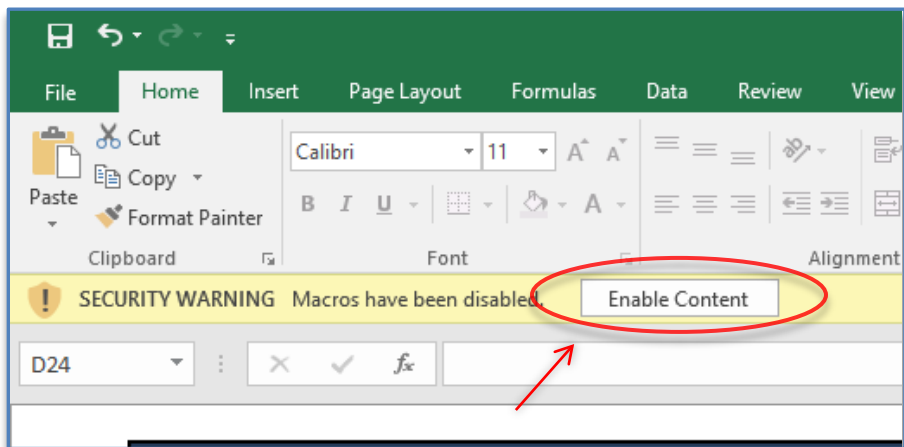

For each hydrogen refueling station, the station **owner**, who is the regulated entity, must submit an application in the LRT-CBTS that contains the information described below. All fields marked with an asterisk (*) must be filled out for an application to be complete.

Please note, currently the available application template may only be completed on a Windows computer using Microsoft Excel software because it is **not** supported on Mac computers.

STEP 1

Make sure that the macros are enabled in the Excel file by clicking the “Enable Content” button.

¹ 95486.2

STEP 2

Complete the Station Owner Details section with the name and address of the proposed station and the Applicant Representative section with the information of the contact person for the owner entity.

The Federal Employee Identification Number (FEIN) must be the same nine-digit number as currently registered by the entity in the LRT.

Station Owner Details	
Organization Name * <input type="text"/> Address Line 1 * <input type="text"/> City * <input type="text"/> Zip Code * <input type="text"/>	Federal Employee Identification Number (FEIN) * <input type="text"/> Address Line 2 * <input type="text"/> State or Province * <input type="text"/> Country * <input type="text"/>
<p>Must be same FEIN as entity that is already registered in the LRT</p>	
Applicant Representative	
Primary Contact Name * <input type="text"/> Business Phone * <input type="text"/> Email * <input type="text"/>	Title Position * <input type="text"/> Mobile Phone * <input type="text"/>

STEP 3

Complete the Station Details with information for the proposed station. To more accurately locate the site, the latitude and longitude must be provided with at least 5 decimal places. However, if the fifth decimal place is a 0, we suggest providing at least 6 decimal places if available.

Station Details

Station Name *

Address Line 1 *

Address Line 2

City *

Zip Code *

Location * Latitude Longitude

STEP 4

Complete the daily permitted hours of operation for the proposed station.

Expected Daily Permitted Hours *

24 hours

Less than 24 hours

If the daily permitted hours are less than 24 hours, indicate the hours of operation using the 24-hour clock. For example, if the station is permitted between 6 am and 8 pm, enter 06:00 and 20:00. Once entered, the format of the time will automatically shift to regular time. If less than 24 hours, the applicant must attach documentation in pdf format provided by the applicable permitting authority demonstrating permitted hours for the site.

Expected Daily Permitted Hours *

Hours of Operation to 24 hours

Make sure to include supporting documentation

Attach pdf file →

hour of operation information

STEP 5

Complete the station nameplate refueling capacity for the permitted hours of operation using the HySCapE 1.0 model.

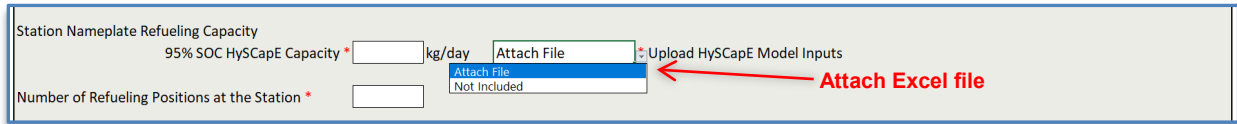

The HySCapE 1.0 model (with instructions on how to download the model) can be found here: https://www.arb.ca.gov/fuels/lcfs/2018-0813_hyscape_download_instructions.pdf.

Use the “Mass Dispensed at 95% SOC limit” option to determine the station nameplate capacity. For other settings, use the default HySCapE 1.0 settings². The applicant must upload a completed model input sheet to the application. Note that the capacity should be less than or

² Default settings:

- Vehicle Demand Profile: ChevronFriday
- Time Between Fills: 255 seconds
- Vehicle Storage Volume: 126 liters
- Storage Level to Trigger Delivery: 30 percent
- Hourly Distribution: Even

equal to 1,200 kg/day. Also indicate the number of light duty vehicle (H70) refueling positions at the proposed station.

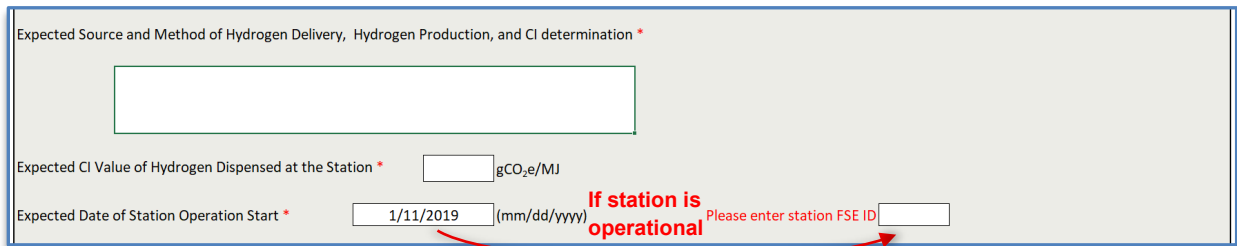

Station Nameplate Refueling Capacity
 95% SOC HySCapE Capacity * kg/day Upload HySCapE Model Inputs
 Number of Refueling Positions at the Station * **Attach Excel file**

STEP 6

Indicate the expected source, method used for delivery, and CI value of the hydrogen dispensed at the station. If the CI value for hydrogen is not known at the time of application, provide the best estimate of the CI value that it will receive based on expectations for near-term (one to two years) hydrogen supply. Indicate also the expected date that the station will be operational.

If the station is already operational, as indicated by a operational date prior to the application date, please also enter the station FSE ID. The FSE must be registered in the LRT to obtain the FSE ID.

Expected Source and Method of Hydrogen Delivery, Hydrogen Production, and CI determination *

 Expected CI Value of Hydrogen Dispensed at the Station * gCO₂e/MJ
 Expected Date of Station Operation Start * (mm/dd/yyyy) **If station is operational** Please enter station FSE ID

If the station is not yet operational, the station FSE ID is not needed and the field will disappear.

Expected Date of Station Operation Start * (mm/dd/yyyy)

Please see section 5 of this document for instructions on updating the FSE ID upon registration of FSE after submitting the HRI application.

STEP 7

Attach the justification for the station location and a signed attestation letter using the drop-down menu. Station location justification is required in all applications. If the station is approved under the California Energy Commission’s AB 8 grant funding, please submit a letter that identifies the specific solicitation that funding was approved under and confirms that the applicant has not increased, and is not planning to increase, the capacity approved by the CEC. The signed attestation letter from the applicant must attest to the veracity of the information in the application packet. If necessary, upload all redacted information as a single zip file using the drop-down menu.

Additional Documents to Include

* Station Location Justification **Attach pdf file**

* Signed Attestation Letter **Attach pdf file**

Upload Redacted Information (zip all material into a single file)

Zip-file Containing Any Redacted Material **Attach zip file**

The attachments will be indicated in the Attachment Box, as shown below. Note that the attachments are in .pdf, .xlsx, and .zip format depending on the attachment type. If the applicant has additional supporting documentation that cannot be converted to .pdf, then refer to them in the uploaded .pdf document and submit the additional documentation as separate attachments in the same LRT correspondence.

Expected Daily Permitted Hours * Hours of Operation to 14:00 hours
 Make sure to include supporting documentation Hour of operation information

Station Nameplate Refueling Capacity
 95% SOC HySCapE Capacity * kg/day * Upload HySCapE Model Inputs

Number of Refueling Positions at the Station *

Expected Source and Method of Hydrogen Delivery, Hydrogen Production, and CI determination *

Expected CI Value of Hydrogen Dispensed at the Station * gCO₂e/MJ

Expected Date of Station Operation Start * (mm/dd/yyyy) Please enter station PSE ID

Additional Documents to Include

* Station Location Justification

* Signed Attestation Letter

Upload Redacted Information (zip all material into a single file)

Zip-file Containing Any Redacted Material

I certify that the station meets the following requirements:

* Station Under Consideration Will Be Open to the Public

* Station under consideration is not receiving funding pursuant to any settlement related to any California or Federal regulation enforcement

Attachment Box

<input type="text" value="C:\HRI_Application\location justification.pdf"/> Justification	<input type="text" value="C:\HRI_Application\attestation.pdf"/> Attestation	<input type="text" value="C:\HRI_Application\hyscape.xlsx"/> HySCapE
<input type="text" value="C:\HRI_Application\redacted.zip"/> Redacted	<input type="text" value="C:\HRI_Application\permitting.pdf"/> Permitting	

STEP 8

Certify that the station under consideration will be open to the public, is not receiving funding pursuant to any settlement related to any California or Federal regulation enforcement, and is not built as a required mitigation measure for CEQA by choosing “Yes” from the drop-down menu.

I certify that the station meets the following requirements:

Yes * Station Under Consideration Will Be Open to the Public

Yes * Station under consideration is not receiving funding pursuant to any settlement related to any California or Federal regulation enforcement

No * Station under consideration is not built as a required mitigation measure for CEQA

4 Submitting an Application for Hydrogen Refueling Infrastructure

All applications must be submitted to the LRT using the Correspondence feature.

STEP 1

Log into the LRT-CBTS using your username and password.

Version: V2.9950

For Reporting Use Only [Contact ARB](#)

LOW CARBON FUEL STANDARD

Reducing the Carbon Intensity of California Transportation Fuels

LRT-CBTS & AFP Login

Username:

Password:

[Reset Password](#)

Low Carbon Fuel Standard Reporting Tool and Credit Bank & Transfer System (LRT-CBTS)

Click the "LRT-CBTS Account" if you are the designated administrator or primary contact person for LCFS Quarterly and Annual Reporting and have not registered your organization. Upon account approval by ARB you will be able to login and assign roles to other users. Only users assigned "Signatory Authority" are able to submit LCFS reports. If you are an employee of a registered organization and you are only in need of a user account, please contact the administrator for your organization.

Click the "CBTS Broker Account" if you need an account solely for transferring LCFS credits. You will be registered as a "Broker" in the system upon account approval by ARB and will be notified by email. You will be added to the list of registered brokers. LCFS Regulated Parties will be able to select brokers from the list of registered brokers.

STEP 2

Select the Correspondence tab.

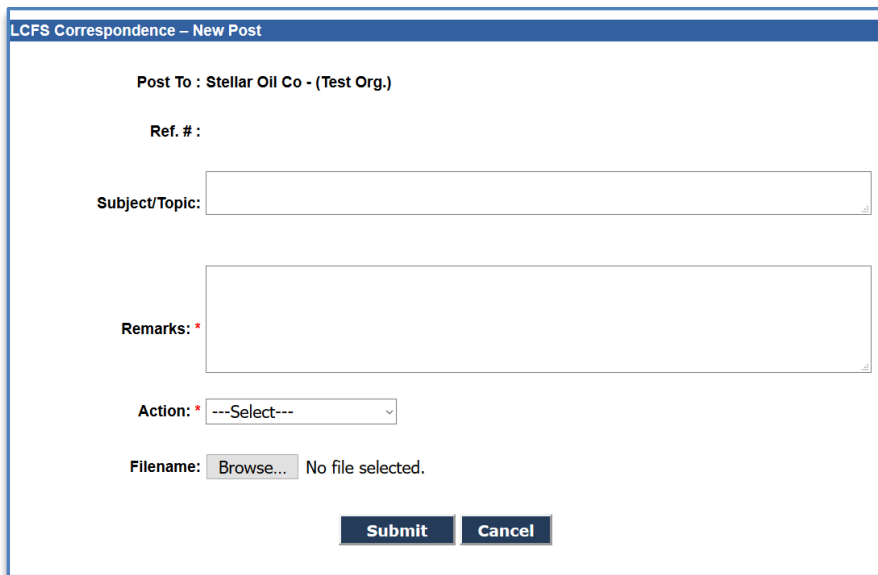

STEP 3

Create a new post per application by clicking on the “New Post” button.

A new post will appear.

Enter “HRI Application-<Site Name>” in the “Subject/Topic” text box. Enter a short description in the “Remarks” text box. Choose “Post New Issue” in the “Action” drop-down menu.

Post Question

Post Clarification **Submit** **Cancel**

Attach the additional attachment using the “Browse...” button and submit the post by clicking the “Submit” button.

Click “OK” to submit the post when prompted.

Click “OK” when you receive confirmation that the post was submitted.

To submit additional attachments, repeat this step (STEP 4) of this section.

5 Updating Fueling Supply Equipment (FSE) ID

For hydrogen, FSE refers to a fueling station. A hydrogen station with multiple dispensers is considered a single FSE. When a station becomes operational, it must be registered in the LRT

prior to generating credits under the HRI provision. Pursuant to section 95486.2(a)(4)(E), the FSE registration must be completed pursuant to section 95483.2(b)(8) of the LCFS regulation.³

If the FSE was not registered at the time of submitting the HRI application, then at the time of requesting FSE registration, please include a note in the Remarks section indicating that the FSE under consideration are part of a submitted HRI application. Please include the Correspondence Reference ID through which the application was submitted and the name of the site as provided in the HRI application. Upon FSE registration, the applicant will receive a unique FSE ID that must be used for reporting fuel transactions in the LRT-CBTS.

If the station was approved for HRI crediting prior to the site becoming operational, the applicant must demonstrate the operability of the station within 24 months of application approval pursuant to section 95486.2(a)(4)(G) of the LCFS regulation. If the applicant fails to demonstrate that the station is operational within 24 months of approval, the HRI application will be canceled. The actual date of operation and the FSE ID must be submitted through the Correspondence feature of the LRT under the original application reference through the “Post Clarification” option in the drop-down menu.

6 Informing CARB about Changes to an Application

Pursuant to section 95486.2(a)(4)(A), the applicant is responsible for informing CARB of any change in information that deviates from the original HRI application. The applicant must provide updated information and a new attestation must be submitted pursuant to section 95486.2(a)(2). Changes include (but are not limited to) changes to station design or equipment, changes to operational practices, cancellation of the project, or any parameter that could affect HRI crediting. Please note that if the nameplate refueling capacity is being increased, the applicant must apply for an expansion pursuant to section 95486.2(a)(7).

The updated application information and attestation must be submitted via the Correspondence feature in the LRT under the original application reference through the “Post Clarification” option in the drop-down menu.

³ For more information on FSE registration process, please refer to LCFS guidance 19-04 available here: <https://ww2.arb.ca.gov/our-work/programs/low-carbon-fuel-standard/lcfs-guidance-documents-user-guides-and-faqs#guidance>.
