

R-22 Equipment Retrofits & Replacements

R-22 production is being phased out by the U.S. EPA. Beginning in 2020, there will be no new production or import of virgin R-22 permitted in the United States. HFC replacements for R-22 are potent climate-forcing agents and thus increasingly subject to regulations, including national bans.¹

GLOBAL WARMING POTENTIAL (GWP)²

PREPARING FOR THE FUTURE

New low-GWP technologies are advancing rapidly and are available today. In some applications, low-GWP technologies can provide higher energy efficiency.

Visit www.arb.ca.gov/rmp for more information on low-GWP options.

¹ Certain HFCs are being banned for both retrofits and replacements, but can still be used for maintenance. www2.epa.gov/snap
² GWP values here indicate climate-forcing impact over a 100-year period relative to that of carbon dioxide, as found in the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (2007), except for R-1233zd and R-1234yf, obtained from the Fifth Assessment Report.
