Subject: GWP Reduction IPE

Diversified CPC International is a propellant supplier of liquefied propellants as well as HFC-152a and HFO-1234ze to the Aerosol Industry. Diversified CPC supports the GWP Reduction IPE proposed by the National Aerosol Association (NAA). Please find attached.

This proposal provides flexibility to the Industry and provides a pathway to reduce GWP in various ways. The proposal uses the concept of Reactivity which is the best science we have to control VOC's.

Thank you for your time in considering our comments. If you have any questions, feel free to contact our consultant Doug Raymond, at 440-339-4539 or by email at djraymond@me.com.

Sincerely,

A handwritten signature in black ink that reads 'William N. Auriemma'.

William N. Auriemma
