Subject: GWP reduction IPE

Aeropres Corporation supplies Liquified propellant as well as HFC-152a and HFO-1234ze to the Aerosol Industry. Aeropres supports the attached GWP IPE proposed by the National Aerosol Association (NAA).

This proposal uses the concept of Reactivity. Aeropres has been a supporter of the Concept of Reactivity for more than 25 years. Reactivity is sound science and should be applied whenever possible. In addition, this proposal allows CARB to leverage the innovation power of the consumer products industry along with providing much needed flexibility.

Thank you for considering our comments. Any questions feel free to contact me at 318-464-6808 or by email at mrivers@aeropres.com.

Sincerely,

Mark Rivers
Vice President of Technical Services
Aeropres Corporation
