LEGAL BACKGROUND

- (1) Purpose. The California Health and Safety Code mandates the reduction of emission of air pollution from motor vehicles and requires CARB to adopt regulations that require owners and operators of heavy-duty vehicles to perform regular inspections of their vehicles for excess emissions. (Health & Saf. Code §§ 43013, 43018, 43701, 44011.6.)
- (2) Regulation. CARB adopted the "*Periodic Smoke Inspections of Heavy-Duty Diesel-Powered Vehicles*" Regulation (Cal. Code Regs., tit. 13, §§ 2190 et seq.) (PSIP Regulation) to reduce excess smoke opacity emissions from heavy-duty vehicles.
- (3) Regulatory Provisions. The PSIP Regulation requires owners and operators of heavy-duty diesel vehicles with gross vehicle weight ratings greater than 6,000 pounds that operate within the State of California to conduct annual smoke opacity inspections (or on-board diagnostic review for model year 2013 engines or newer) of their vehicles by a CARB-approved trained smoke tester, using smoke test equipment and procedures that comply with the Society of Automotive Engineers (SAE) procedures J1667, "Snap Acceleration Smoke Test Procedure for Heavy-Duty Powered Vehicles. Owners and Operators must also keep records of this data and provide to CARB upon request. (Cal. Code Regs., tit. 13, §§ 2190-2194.)
- (4) Penalty Provisions. Failure to comply with the regulatory requirements is a violation of state law that may result in penalties up to forty thousand seven hundred twenty-five dollars (\$40,725) for each strict liability violation of the PSIP Regulation, respectively, for each day in which the violation occurs. (Health & Saf. Code, § 44011.6; Cal. Code Regs., tit.13, § 2190 et seq.)

PENALTY BASIS

- (31) Per Unit Penalty. The per unit or per vehicle penalty in this case is a maximum of forty thousand seven hundred twenty-five dollars (\$40,725) per day for each day the vehicle is in violation of the Health and Safety Code section 44011.6 and PSIP Regulation. (Cal. Code Regs., tit.13, § 2190 et seq.) The penalty of \$2,035.00 over an unspecified number of days of violation is for five noncompliant heavy-duty vehicles. The per unit penalty in this case is approximately \$407.00 per noncompliant vehicle.
- (32) Emissions. The provisions cited above do prohibit emissions above a specified level. Without information on usage and emission rates, it is not practicable to quantify the excess emissions. However, since CARB has alleged that the vehicle did not meet the regulatory requirements, all of the emissions from it were excess and illegal.
- (33) Aggravating and Mitigating Factors. The penalties in this matter were determined in consideration of all relevant circumstances, including statutory factors as described in CARB's Enforcement Policy. CARB considered whether the violator came into compliance quickly and cooperated with the investigation; the extent of harm to public health, safety and welfare; nature and persistence of the violation, including the magnitude of the excess emissions; compliance history; preventative efforts taken; innovative nature and the magnitude of the effort required to comply, and the accuracy, reproducibility, and repeatability of the available test methods; efforts to attain, or provide for, compliance prior to violation; action taken to mitigate the violation; financial burden to the violator; and voluntary disclosure. The penalties are set at levels sufficient to deter violations, to remove any economic benefit or unfair advantage from noncompliance, to obtain swift compliance, and the potential costs, risks, and uncertainty associated with litigation. Penalties in future cases might be smaller or larger depending on the unique circumstances of the case.
- (34) Confidential Business Information. CARB based this penalty in part on confidential business information provided by G & P Trucking, Inc. and confidential settlement communications, neither of which are retained by CARB in the ordinary course of business.
