

## What are your specific concerns or interest in Warehouses? / ¿Cuáles son sus preocupaciones o intereses específicos de almacenes?

### Responses

- getting run over by a forklift
- Electrification
- Health and Safety of workers
- Lack of immediately reduction in emissions
- Siting warehouses directly adjacent existing homes, school, parks, and other sensitive receptors
- Noises in residential areas
- With the Port of LA alone seeing 10.8M TEU's just this year, and a record 15 Ships per day up from 10 skips prepandemic, we clearly have many more trucks and container activities to these warehouses. Since the warehouses are in EJ communities, something needs to be advanced on diesel emissions.
- No reinvest in the community. Once they're there, you don't hear them be one with the community.
- Cumulative air pollution impacts in most polluted areas
- increasing # of warehouses in the valley affecting already disadvantaged communities
- Disregard for community
- Taking over the community
- stopping air pollution from trucks
- Exploitive labor practices
- Traffic concerns
- Located adjacent to schools
- Truck routes
- Workers comp
- Truck idling
- The indoor air quality for workers
- WAY TOO MANY!

## What can we do to better facilitate your participation in the regulatory development process? / ¿Qué podemos hacer para facilitar su participación en el proceso de desarrollo regulatorio?

Responses

- Come to the community e.g events
- Community listening sessions on location
- Include industry in local solutions
- Diverse modes of outreach
- Keep community members informed of steps in the process. If we're not paying close enough attention, we can miss the project entirely or miss deadlines.
- As was stated before, more permanent monitoring at various location and major hubs to gain valuable data for everyone to use, study and talk about.
- Listen to all parties involved in emissions changes
- Have workshops and mini groups

“ Include business permitting requirements ”

### Responses

Appreciate how interactive these are. If there's a chance or way to get feedback from non-English speakers or folks who are less technologically savvy, t

Include business permitting requirements

Maybe having these quarterly or 3x a year meetings

Have planners and City officials in the meeting who are approving these projects to hear comments from the communities most impacted at these meetings.

Monthly, quarterly at least

Host them more often
