

Next Steps and Closing

2022 Scoping Plan Update Schedule

Example Questions For this Scoping Plan

- What approaches to CN exist that are technologically feasible, cost-effective, and have minimal impacts to households and jobs? How quickly can sectors transition?
- How can we maximize air-quality and public health benefits for vulnerable communities?
- Given potential limits to electrification, how do we best use RNG and renewable hydrogen, and what are the infrastructure needs to further reduce/replace fossil fuels?
- What are the environmental and economic trade-offs of NWL actions and how do these actions intersect with other sectors (i.e. electricity/fuels, land-use, etc)?
- What lessons from the current public health and economic situation should apply to the strategies/pathway for emission reductions?
- And much more!

Focus Area Workshops Starting Tomorrow

First Day: Wednesday, June 9, 2021

Morning Session – Natural and Working Lands

Time: 9:30 am – 12:00 pm (Pacific Time)

Afternoon Session – Equity and Environmental Justice

Time: 1:30 pm – 4:00 pm (Pacific Time)

Second Day: Thursday, June 10, 2021

Morning Session – Transportation Sector

Time: 9:30 am – 12:00 pm (Pacific Time)

Afternoon Session – Electricity Sector

Time: 1:30 pm – 4:00 pm (Pacific Time)
