

Proposed Priority Topic Groupings for AB 32 Environmental Justice Advisory Committee

While there are many interactions across all sectors and topics, several groupings are proposed to help combine the discussion of topics that seem to be the most interconnected.

Group	Topics*
A	Carbon neutrality timeframe
	Role of engineered carbon removal (carbon capture and sequestration (CCS), direct air capture)
B	Transportation technologies for onroad light-, medium-, and heavy-duty vehicles, including transit buses; offroad, including locomotives, cargo handling equipment, ocean going vessels, commercial harbor craft, and aircraft
	Petroleum fuels
	Vehicle Miles Traveled (VMT)
C	Electricity supply
	Building decarbonization
D	Short-Lived Climate Pollutants (methane, hydrofluorocarbons, black carbon)
	Woody biomass and solid biomass waste
E	Industry
	Natural gas grid
	Hydrogen
F	Public health
	Social Cost of Carbon

*Table topics are based on the topics for prioritization provided to EJAC related to Scoping Plan modeling scenario assumptions and other topics raised at EJAC meetings.
