CALIFORNIA AIR RESOURCES BOARD

Executive Order G-714-ADF-FE11

Alternative Diesel Fuels Regulation  
Fleet Exemption for Oldenkamp Trucking Inc. - Bakersfield, California

Pursuant to Sections 39600, 39601, 43013, 43018, and 43101 of the Health and Safety Code, the California Air Resources Board (CARB) adopted the Regulation on Commercialization of Alternative Diesel Fuels (ADF regulation) published at title 13, California Code of Regulations (CCR), section 2293 et seq. Effective since January 1, 2016, the ADF regulation establishes a comprehensive, multi-stage process administering the commercialization of alternative diesel fuels in California. The ADF regulation governs the introduction and use of innovative alternative diesel fuels in California while preserving or enhancing public health, environmental, and emission benefits of the existing motor vehicle diesel-fuel regulations.

The ADF regulation includes specific provisions designed to control potential increases in oxides of nitrogen (NO<sub>x</sub>) emissions that could otherwise be caused by the use of biodiesel under certain circumstances. These in-use requirements have been in effect since January 1, 2018. The ADF regulation includes exemptions to the in-use requirements for qualifying fleets if owners or operators can demonstrate that they meet the exemption conditions specified in the ADF regulation section 2293.6(a)(5)(A)1, 2, and 3. A fleet exemption may be granted if the following conditions are met: 1) the fleet owner or operator can demonstrate to the Executive Officer that at least 90 percent of the fleet consists of a combination of light and medium duty vehicles and heavy duty new technology diesel engine (NTDE) vehicles; and 2) any unmitigated biodiesel approved under this Executive Order will only be used by the exempted fleet.

Oldenkamp Trucking Inc. (Oldenkamp Trucking) has requested a fleet exemption for their fleet fueling facility located at 10303 South Enos Lane, Bakersfield, CA 93311.

Oldenkamp Trucking submitted their complete fleet composition list of vehicles at Bakersfield fleet on July 27, 2021 (Confidential Attachment 1). The fleet meets the requirement that at least 90 percent of the fleet consists of a combination of light and medium duty vehicles and heavy duty vehicles with NTDEs, as specified pursuant to section 2293.6(a)(5)(A)2.

Oldenkamp Trucking Bakersfield fleet demonstrated that the fleet fueling facility has a centralized and specified secure fueling area. The fueling facility is located in a gated

lot where entry is only permitted through a scan code on all fleet units as well as unique identification code access.

Oldenkamp Trucking Bakersfield fleet demonstrated that the fleet fueling facility has procedures or protocols in place to reasonably preclude fueling of vehicles that are not in the exempted fleet. All fuel dispensers are locked down to only Oldenkamp Trucking Bakersfield fleet drivers. All drivers use card reader system through Fuelmaster, installed and maintained by Cal Valley equipment to account for fuel usage, restrict unauthorized fill ups, and identify unit/driver numbers. Only the authorized vehicles specified in Confidential Attachment 1 are allowed to access or dispense fuel at this site.

In addition, Oldenkamp Trucking Bakersfield fleet will notify CARB of any changes to the fleet composition.

NOW, THEREFORE, (IT IS ORDERED AND RESOLVED) that the Oldenkamp Trucking Bakersfield fleet located at 10303 South Enos Lane Bakersfield, CA 93311, has met all requirements for fleet exemption and is granted an exemption from the in-use requirements in section 2293.6 of the ADF regulation.

CARB reserves the right in the future to review this Executive Order Fleet Exemption to confirm that the exemption continues to meet the requirements, conditions, standards, and procedures of title 13, California Code of Regulation, section 2293, et seq.

Violation of any of the above conditions shall be grounds for revocation of this Executive Order.

Executed at Sacramento, California, this 23rd day of August, 2021.
