

VIRTUAL PUBLIC WORKSHOP

Help Build More Sustainable and Equitable Communities

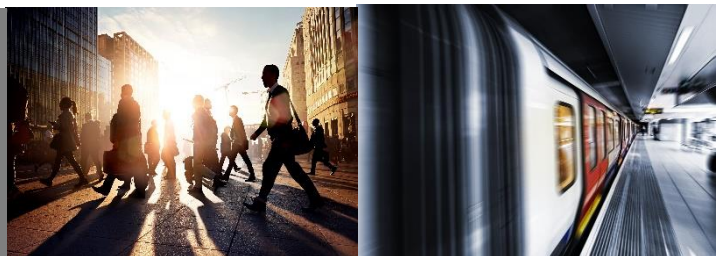

You are invited to provide input on advancing work to help build more sustainable and equitable communities through State-level policy and planning work to affect transportation, land use and housing options in California. This discussion is intended to contribute to CARB's work in a number of areas including, the 2022 Report on the Implementation of the Sustainable Communities and Climate Protection Act (2022 SB 150 Report), the 2022 Climate Change Scoping Plan Update, as well as State interagency efforts.

The State's strategy to prevent the negative impacts of climate change calls for curbing the overall number of drive-alone miles completed daily on California's roadways. As part of these efforts, CARB and partner State agencies are exploring further strategies to reduce the amount of driving where possible, increase accessibility to important destinations, and make travel by clean transportation options such as public transit, carpooling, walking, biking, and shared mobility services more viable and attractive options for getting people where they need and want to go.

The upcoming workshop is an opportunity to learn more about and share input on key questions related to future policies to reduce the amount of driving.

VIRTUAL WORKSHOP
December 7, 2021
5:00 – 7:00 p.m.

How to Participate

Register: https://us06web.zoom.us/webinar/register/WN_oO214kS9S8-c0ksx4zdjtQ

This virtual workshop is being conducted on Zoom. To participate, register using the link above. After registering, you will receive a confirmation email with information to join the webinar either through a computer, digital device, or phone line.

Contact Information: If you have questions about the workshop, contact SustainableCommunities@arb.ca.gov.
