Workshop Purpose: Since building decarbonization offers significant GHG and criteria pollutant emission reduction potential, this workshop will inform CARB’s efforts to assess building decarbonization as part of the 2022 Scoping Plan Update, as a potential measure for the 2022 State Strategy for the State Implementation Plan (State SIP Strategy) for meeting federal air quality standards, as a proposal to the California Green Building Standards Code (CALGreen), and other agency efforts. State agencies, experts and the public will discuss building decarbonization efforts underway, environmental justice considerations, benefits, challenges, opportunities, and market readiness. Specifically, this workshop will explore these challenges and opportunities with a focus on building electrification, which is one avenue toward decarbonizing buildings—and one where efforts now, as the electricity grid is becoming increasingly powered by renewable and zero-carbon sources, can provide significant benefits through the coming decades.

9:00 am	Introduction and Welcome	California Air Resources Board
9:05 am	Panel 1: Building Decarbonization Efforts and Important Considerations	California Air Resources Board California Energy Commission California Public Utility Commission RMI
9:55 am	Environmental Justice Advisory Committee Comments	Environmental Justice (EJ) Advisory Committee Member or Designee
10:10 am	Panel 1: Public Comments, Questions and Observations	
Break (10 minutes)		
10:50 am	Panel 2: Consumer Costs and Market Trends	A.O. Smith California Energy Commission Natural Resources Defense Council Physicians for Social Responsibility-Los Angeles
11:35 am	Panel 2: Public Comments, Questions and Observations	
Lunch Break (55 minutes)		

1:00 pm	<p>Panel 3: Policy Opportunities to Advance Building Decarbonization</p>	<p>Bay Area Air Quality Management District</p> <p>California Code Consultants, LLC</p> <p>Greenlining Institute</p> <p>Sierra Club</p>
1:45 pm	<p>Panel 3: Public Comments, Questions and Observations</p> <p>General Public Comments and Answers to the Following:</p> <ol style="list-style-type: none"> 1. What building end uses and building types should be prioritized for building decarbonization through electrification efforts? 2. Are there model policies from other jurisdictions or specific policies that should be prioritized as California considers a path forward to equitable building electrification? 3. What complementary policies are the most important to advance in the near-term and how should they be prioritized? 	
2:50 pm	<p>Closing Remarks and Next Steps</p>	<p>California Air Resources Board</p>
