

Cap-and-Trade Program Vintage 2022 Allocation Summary

This document provides a summary of vintage 2022 allowance allocation under the Cap-and-Trade Program (Program) aggregated by sector. Industrial allowance allocation data are disaggregated by general industrial activity. Allowance allocation methodologies for each sector can be found in [Cap-and-Trade Regulation](#) sections 95890 through 95895. Details on allowance allocation to electrical distribution utilities are not included in this document and are instead posted online at <https://www.arb.ca.gov/regact/2016/capandtrade16/attach10.xlsx>.

Because facility-level allowance allocation data could reveal confidential business information, the allocations to each industrial sector presented in Table 1 below are aggregated so that they include at least five companies.

Entities that received no vintage 2022 allocation or that have a negative allocation balance that will carry over to next year do not appear in this document. Also, pursuant to section 95835(c), an entity with emissions below the Program inclusion threshold for a full compliance period may request to exit the Program. Facilities exiting the Program are not eligible to receive allowance allocation and do not appear in this document.

The “Total Allocation” values in the table below are the sum of vintage 2022 allowances allocated to eligible entities. “Total Allocation” values exclude any negative allocation balance that will carry over to next year. “Total Allocation” values include allowances that have true-up value. Vintage 2022 allowances with true-up value are eligible to be used for compliance for covered emissions in 2020 and subsequent years, and the quantity “Total True-Up Value” is a subset of “Total Allocation” in Table 1 below.

The vintage 2022 allowance allocation to electrical distribution utilities in the table below reflects a reduction from the total amount in Table 9-4 of the Cap-and-Trade Regulation to account for 2020 Energy Imbalance Market (EIM) Outstanding Emissions. CARB directly retired these allowances for EIM Outstanding Emissions in 2020 as required by sections 95852(l)(2) and 95892(a)(3) of the Cap-and-Trade Regulation to address emissions leakage related to operation of the EIM.

Detailed information regarding allocation to industrial and other sectors may be found on CARB’s Allowance Allocation web page (<https://ww2.arb.ca.gov/our-work/programs/cap-and-trade-program/allowance-allocation>). Questions regarding allowance allocation may be directed to David Allgood at (916) 445-8238 or David.Allgood@arb.ca.gov.

Table 1. Summary of Vintage 2022 Allowance Allocation.

Sector	Total Allocation	Total True-Up Value	Total Facilities
Petroleum Refining and Hydrogen Production	14,812,748	9,218	24
Crude Petroleum and Natural Gas Extraction	5,692,796	191,261	27
Cement, Lime, Gypsum, and Clay Product Manufacturing	7,496,117	346,776	14
Fruit and Vegetable Canning	601,394	37,821	13
Other Food Manufacturing	381,799	11,027	11
Dairies	331,812	26,590	8
Glass Manufacturing	533,322	27,045	9
Paper Manufacturing	374,645	13,170	5
Metal Processing and Manufacturing	199,892	9,913	7
Chemical, Biological, and Pharmaceutical Manufacturing	400,927	0	8
Misc. Industrial Facilities, Legacy Contract Generators, and Waste-to-Energy Facilities	1,850,286	70,293	14
Total Industrial, Legacy Contract Generator, and Waste-to-Energy Facilities (sum of above rows)	32,675,738	743,114	140
Natural Gas Suppliers	37,621,325	0	7
Universities and Public Service Facilities	831,135	0	14
Public Wholesale Water Agencies	37,469	0	1
Electrical Distribution Utilities¹	71,930,584	0	54
TOTAL ALLOWANCE ALLOCATION	143,096,251	743,114	216

¹ The total vintage 2022 allowance allocation to electrical distribution utilities (EDUs) reflects a deduction of 977,520 allowances from the total amount in Table 9-4 of the Cap-and-Trade Regulation to account for 2020 EIM Outstanding Emissions. For more information on EDU allocation, please see <https://www.arb.ca.gov/regact/2016/capandtrade16/attachc.pdf>. Vintage 2021-2030 allowance allocations to EDUs are posted on the Cap-and-Trade Program webpage: <https://www.arb.ca.gov/regact/2016/capandtrade16/attach10.xlsx>.

Table 2. NAICS Codes and Facilities Included in Petroleum Refining and Hydrogen Production in Table 1.

Sector	NAICS Codes	Facility Names and ARB IDs
Petroleum Refining and Hydrogen Production	<ul style="list-style-type: none"> • 324110 – Petroleum Refineries • 324199 – All Other Petroleum and Coal Products Manufacturing • 325120 – Industrial Gas Manufacturing 	100002 – Tesoro Los Angeles Refinery - Wilmington Calciner
		100127 – Air Products Wilmington Hydrogen Plant
		100138 – Chevron Products Company - El Segundo Refinery, 90245
		100217 – Torrance Refinery
		100303 – Phillips 66 Company - San Francisco Refinery
		100329 – Phillips 66 Company - Los Angeles Refinery - Wilmington Plant
		100351 – Phillips 66 Company - San Francisco Carbon Plant
		100372 – Valero Refining Company - California, Benicia Refinery and Benicia Asphalt Plant
		100913 – Phillips 66 Company - Los Angeles Refinery - Carson Plant
		100914 – Martinez Refining Company
		101053 – Linde Inc.
		101162 – Lunday-Thagard Company DBA World Oil Refining
		101205 – Ultramar Inc – Valero Wilmington
		101226 – Phillips 66 Company - Santa Maria Refinery
		101239 – San Joaquin Refining Company
		101246 – Los Angeles Refinery
		101248 – Air Products Carson Hydrogen Plant
		101384 – Chevron Products Company - Richmond Refinery, 94802
		101507 – Kern Oil Refinery
		101512 – Air Products Manufacturing Corporation Sacramento
		101701 – Air Liquide El Segundo Hydrogen Plant
		101709 – DeMenno/Kerdoon
		101749 – Air Liquide Large Industries US L.P. - Rodeo Hydrogen Plant
104005 – Tricor Refining LLC
