

## Exhibit C2 - Timeline/Milestones

### Section 5: Timeline

Presuming grant approval proceeds as scheduled, the project schedule will be:

Item of Task	Due Date
Work Plan	Spring 2022
Preparation	Spring 2022 to Winter 2022
Progress report	every six months
1 <sup>st</sup> Intro Bootcamp	Winter 2022
1 <sup>st</sup> Advanced Bootcamp	Spring 2023
Evaluation	Summer 2023
2 <sup>nd</sup> Intro Bootcamp	Fall 2023
2 <sup>nd</sup> Advanced Bootcamp	Winter 2023
Sustainability	Summer 2024
Final report	Summer 2024

We have included a Gantt chart timeline of project tasks in Attachment D.

### Section 6: Programmatic Alignment

*(a) Describe how the proposed project leads toward identifying, evaluating, and/or reducing exposure to, or facilitating the emission reductions of air toxics and criteria air pollutants from stationary and/or, mobile, or area sources in California communities. This may also include greenhouse gas emissions co-benefits.*

After 50 years of advocating for the improvement of air quality, CCA believes that nothing has been more effective in the identification and reduction of exposure to air pollution in California than an informed and engaged cadre of concerned stakeholders. The policies, issues, science, and technology have become more complicated over time, but it has been an informed and demanding public that has been the unwavering foundation of the remarkable improvements in air quality in California over time.

The proposed project, the All About Air Quality Bootcamp, will provide EJ community members with the skills and ability to identify, evaluate, and help reduce exposures to air toxics and criteria air pollutants in target EJ communities throughout California.
