VI. Programmatic Alignment

Describe how the proposed project leads toward identifying, evaluating, and/or reducing exposure to, or facilitating the emission reductions of air toxics and criteria air pollutants from stationary and/or, mobile, or area sources in California communities. This may also include greenhouse gas emissions co-benefits.

Stockton Residents will directly benefit from CCDS & our partnership with LMR to deliver continued education on the AB 617 CERP implementation phase and its potential to reduce the health risks of poor air quality. CCDS will facilitate participation by delivering critical accommodations like culturally appropriate outreach, linguistically
