Natural Resources Agency California

## Notice of Decision

- Project Title:** 2022 State Strategy for the State Implementation Plan (SCH# 2021070211)
- Project Location:** Statewide
- Public Meeting Date:** September 22, 2022; Agenda Item #22-12-3
- Project Description:** The 2022 State Strategy for the State Implementation Plan (2022 State SIP Strategy) identifies the proposed control measures and emissions reductions necessary from State-regulated sources to support attainment for the federal 70 ppb 8-hour ozone standard, established by U.S. EPA in 2015, for all nonattainment areas in California.

This notice is to advise that the California Air Resources Board (CARB or Board), as the lead agency, approved the above regulatory action on September 22, 2022.

CARB prepared an environmental analysis (EA) in accordance with the requirements of its certified regulatory program under CEQA. (Cal. Code Regs., tit. 14, §15251, subd. (d)). The EA, included as an appendix to the 2022 State SIP Strategy, concluded implementation of the project may result in significant adverse environmental impacts. Mitigation measures were made a condition of approval. The Board made CEQA findings and adopted a statement of overriding considerations for this project.

Staff prepared written responses to comments received during the 45-day comment period that raised significant environmental issues pertaining to this item. The written responses to these environmental comments are included in the Response to Comments on the Draft Environmental Analysis prepared for the 2022 State Strategy for the State Implementation Plan (Response to Comments), which the Board considered prior to taking final action.

The EA included in the strategy, and all other related documents, including the Response to Comments are available for public inspection on the CARB rulemaking webpage at: *2022 State Strategy for the State Implementation Plan (2022 State SIP Strategy) | California Air Resources Board*
