Renée Yarmy, LEED AP O+M
Program Director, Maritime
Port of San Diego
3165 Pacific Highway, San Diego, CA 92101
ryarmy@portofsandiego.org

Dear Renée Yarmy,

Thank you for submitting the revised Port Plan (Plan) and Terminal Plans on behalf of the Port of San Diego to the California Air Resources Board (CARB) as required by the Control Measure for Ocean-Going Vessels At Berth ("Regulation"). CARB staff has reviewed your revised Plan submittals for the National City Marine Terminal, the Tenth Avenue Marine Terminal, and the B Street and Broadway cruise ship terminals and have determined that these plans fulfill the requirements of the Regulation as set forth in sections 93130.14(a) and 93130.14(b). CARB considers these Plans complete, and no changes are necessary at this time.

An updated Terminal Plan for National City Marine Terminal (ro-ro vessels) is due by February 1, 2024, as set forth in section 93130.14(a)(2)(F) and can be submitted to CARB at shorepower@arb.ca.gov. This updated Plan must reflect any changes since the revised Plan. Once received, CARB will have 90 calendar days to review updated plan submissions for any deficiencies.

If any terminal at the Port that is currently designated as a low activity terminal (receiving fewer than 20 visits per calendar year) exceeds the annual visit threshold, the Port must update the Port Plan and submit to CARB by July 1st the following year after the exceedance occurs. The information in the updated plan must reflect the information specified in section 93130.14(b)(3).

If any significant changes occur to any elements of your Port or Terminal Plans, you may resubmit an updated Plan to CARB (shorepower@arb.ca.gov) at any time. Additional information on Port and Terminal Plans can be found on CARB's website at: <https://ww2.arb.ca.gov/new-berth-regulation-implementation>.

Sincerely,

Bonnie Soriano, Branch Chief, Freight Activity Branch
