Subject: Status of Innovative Concept for At Berth Regulation

Dear Captain Chambers,

On December 1, 2021, Intrepid Ship Management (Intrepid) submitted an application for an innovative concept (Application) as a compliance pathway for meeting the requirements of the At Berth Regulation. On July 14, 2022, CARB notified Intrepid by letter that the Application was not complete as it did not contain the minimum information required for all innovative concept applications by section 93130.17(b), available at: [At Berth Final Regulation Text \(ca.gov\)](#). CARB's letter requested Intrepid resubmit a revised, completed Application addressing the missing information by August 19, 2020 ([Innovative Concept Application: Intrepid | California Air Resources Board](#)). CARB did not receive a revised Application by the deadline.

CARB staff attempted to contact you about Intrepid's intentions regarding the Innovative Concept application and left a message on your voicemail requesting a response but we have not heard back from you. We would appreciate a response from Intrepid whether you would like to move forward with the processing of the Innovative Concept application or would like to withdraw Intrepid's Innovative Concept application.

If you would like to proceed with your application, we ask that you respond with the requested information as outlined in the July 14, 2022 email and associated attachment outlining the original application deficiencies by October 24, 2022 so that we can proceed with our evaluation of your concept.

If you would like to speak with us, please let me know and we would be happy to set up a virtual meeting.

Best Wishes,
Angela
