	AB 617 Implementation Funds Final Report										
Ι.	Report Number:	1									
	Title:	CAPP Final Report- Grant G19-CAPP-29									
	Reporting Period:	January 1, 2021, thru June 30, 2022									
	Name of Grantee:	Shasta County AQMD									
	Grant Number:	G19-CAPP-29									
	Date of Submission:	6/15/2022									

II. Costs associated with specific tasks:

(for example: identifying location for monitoring, deploying community air monitoring systems, fence- line monitoring, reporting emissions, developing a community emissions reduction program, establishing best available retrofit control technology requirements, adopting an expedited schedule for the implementation of best available retrofit control technology, community meetings or other Community Air Protection implementation efforts and outreach). Information for outreach events must include the date, location, topics, and number of attendees, for each event.)

BARCT determinations and development of BARCT Rule- \$14,429.45

Cement plant surveillance program in low-income neighborhood- \$7,697.94

Development of portable particulate matter sensors for fence-line monitoring and use in low-income neighborhood- \$7,208.41

Portable methane detector for landfill GHG leak inspections- \$4,563.05

Software for processing live particulate matter monitoring data to post on publicly accessible District website- \$2,620.00

III. How is grant being utilized to meet goals of AB 617: (If applicable, include emissions reductions being achieved)

July 2020- The Shasta County Department of Resource Management included an article on how the public can apply for funds to complete air quality projects in the summer edition of Trash Talk, a newsletter that goes out to 20,000 trash pick-up customers in County areas.

District staff have been interacting with residents in the neighborhood surrounding the cement plant. Residents are aware that the district plans to deploy portable sensors to monitor particulate matter.

June 2020- Contact Shasta County school administration seeking input on potential AB 617 projects including air filtration systems, and zero emission landscaping equipment. The District is currently working with school maintenance staff to identify the best projects for landscape equipment.

The District has been regularly utilizing the AB 617 funded portable methane detector during inspections at the two landfills located in Shasta County. This regular inspection program has resulted in far fewer methane leak detections.

IV. Summary of work completed and in progress since the last progress report:

In 2020 the District began work on Implementing the BARCT determination process for two facilities subject to the regulation. For a cement manufacturing facility, a BARCT determination was made reflecting a consent decree that established BACT level emission limits for cement manufacturing. The draft BARCT determination was completed in April 2021 and the District began incorporating the emission limits into a District rule in 2021. For a diatomaceous earth processing facility, the District completed a BARCT determination in May 2021. The District began development of a new District BARCT Rule that will incorporate the BARCT limits for the two facilities. The District plans to workshop the rule and have it adopted by the end of 2022.

October 2021- In response to an increase in complaints about dust being emitted from a cement manufacturing facility, the District implemented a program to increase inspections and surveillance in the low-income community surrounding the cement

plant. Daily surveillance inspections have resulted in fewer neighbor complaints and district has documented less fugitive emissions being emitted from the facility into the nearby low-income community. Inspection logs available to public upon request.

October 2021 through April 2022- Portable air sensors for low-income communities. The District began assembling equipment and completed testing of sensors that are powered by solar/battery systems and connect to the internet via portable hot-spot type transmitters. These portable sensor units will be used to monitor emissions from the cement manufacturing plant in the surrounding low-income community and can also be deployed as fence-line monitors around the perimeter of the cement plant.

/. Grant funds remaining	and e	xpended:	
District has expended all G19-0	CAPP-	29 Funds (see calcu	ation below and attached spreadsheet with documentation
GRANT FUNDS WITH INTEREST	EARNE	D
