

2025 Mobile Source Strategy

December 2023

What is the Mobile Source Strategy?

The Mobile Source Strategy is a framework that identifies the levels of cleaner and zero-emission technologies necessary to meet California’s criteria pollutant, greenhouse gas, and toxic air contaminant reductions goals. The Mobile Source Strategy uses scenario planning tools to model levels of clean technologies needed, and identifies actions to reduce vehicle miles travelled and high-level concepts for each mobile source sector that could be further developed into regulations and other programs to achieve these levels of cleaner technology.

How does the MSS influence other planning efforts and regulations?

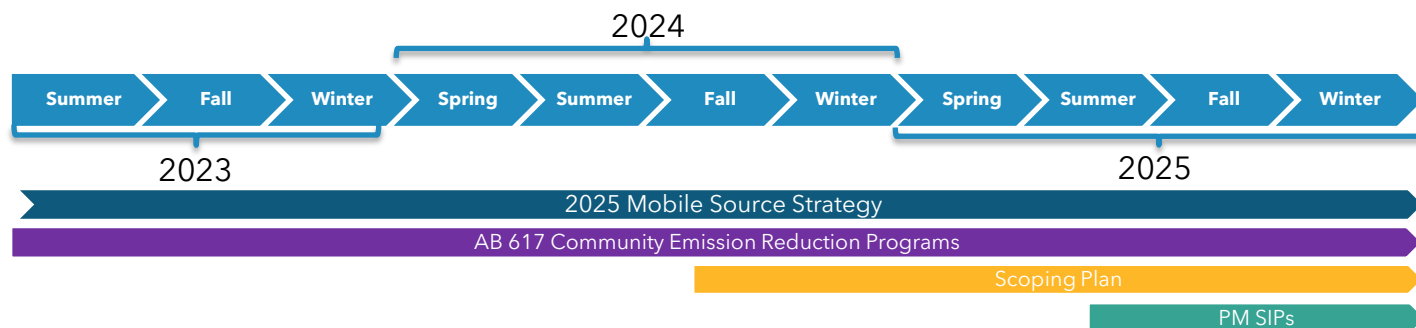

The Mobile Source Strategy has informed the development of other planning efforts including the State Implementation Plan (which has translated Mobile Source Strategy concepts into measures and commitments for specific levels of emissions reductions), the Scoping Plan, and Community Emissions Reduction Plans required for communities selected as a part of CARB’s Community Air Protection Program. Concepts in the 2020 Mobile

Source Strategy that have since been developed into regulations are the In-Use Locomotive, Advanced Clean Fleets, and amended In-Use Off-Road Diesel-Fueled Fleets Regulations.

What is the timing for the 2025 Mobile Source Strategy as related to other CARB efforts?

CARB is beginning development of the 2025 Mobile Source Strategy with the goal of finishing the process by the end of 2025. As mandated by Senate Bill 44 (Skinner, 2019), the 2025 Mobile Source Strategy must be completed by January 1, 2026 and then submitted to the Legislature.

How Can I Engage in the Process?

For the development of the 2025 Mobile Source Strategy, CARB staff plans to provide early, regular, and meaningful outreach and engagement opportunities with all interested parties. At this time, CARB staff is planning the following formal public engagement for the 2025 Mobile Source Strategy:

- Kick-off webinar in January 2024;
- Release of a Discussion Draft 2025 Mobile Source Strategy and 2nd public workshop in Spring 2024;
- Release of a Draft 2025 Mobile Source Strategy and 3rd public workshop by the end of 2024; and
- Release of the final 2025 Mobile Source Strategy by the end of 2025.

We encourage all interested parties to reach out to us with questions, comments, or to request individual meetings with CARB staff to discuss the 2025 Mobile Source Strategy at MSS@arb.ca.gov.

Where Can I Learn More?

CARB is just beginning the development process of the 2025 Mobile Source Strategy, but additional information on the Mobile Source Strategy process and past iterations can be found at <https://ww2.arb.ca.gov/resources/documents/mobile-source-strategy>.
