Dear Edward Washburn:

On December 1, 2021, Pasha Hawaii submitted an Innovative Concepts application as a potential compliance pathway for meeting the requirements of the 2020 At Berth Regulation pursuant to California Code of Regulations, title 17, section 93130.17. On June 19, 2023, the California Air Resources Board (CARB) sent a letter to Pasha Hawaii requesting additional information to complete the Innovative Concepts application. CARB staff did not receive this additional information needed to complete our review by the due date of July 20, 2023.

Additionally, on September 6, 2023, CARB received a letter from you as the authorized representative from Pasha Hawaii formally stating that Pasha Hawaii does not intend to utilize Innovative Concepts. Because Pasha is no longer pursuing the innovative concept, and the lack of response to our request for additional information, Pasha's innovative concept application is denied.

Thank you for your interest in the Innovative Concept program. If you have any additional questions about this matter, please contact Jonathan Foster, Air Resources Engineer, Marine Strategies Section, at [jonathan.foster@arb.ca.gov](mailto:jonathan.foster@arb.ca.gov).

Sincerely,

Bonnie Soriano, Branch Chief, Freight Activity Branch
