21. It is further agreed that the stipulated penalties described in this Agreement are non-dischargeable under United States Code, title 11, section 523(a)(7).
22. **Penalty Determination**

H&SC section 39619.7 requires CARB to provide information on the basis for the penalties it seeks. This Agreement includes this information, which is also summarized here.

**The provision of law the penalty is being assessed under and why that provision is most appropriate for that violation.**

The penalty provision being applied in this case is H&SC section 42402 et seq. because Spencer Gifts sold, supplied, offered for sale, or manufactured for sale consumer products for commerce in California in violation of the Consumer Products Regulations (17 CCR section 94507 et seq.). The penalty provisions of H&SC section 42402 et seq. apply to violations of the Consumer Products Regulations because the regulations were adopted under authority of H&SC section 41712, which is in Part 4 of Division 26.

**The manner in which the penalty amount was determined, including aggravating and mitigating factors and per unit or per vehicle basis for the penalty.**

H&SC section 42402 et seq. provides strict liability penalties of up to \$10,000 per day for violations of the Consumer Product Regulations with each day being a separate violation. In cases like this, involving unintentional violations of the Consumer Products Regulations where there are low VOC emissions and the violator cooperates with the investigation, CARB has obtained penalties based on at least three days of violations (the day the product was purchased by CARB, the day it was supplied to the retailer, and the day it was manufactured for sale). Administrative penalties are also obtained in some cases.

In this case, the total penalty is \$4500 for administrative and emission violations. The per-unit penalty was based on three DAYS of excess VOC emissions and three days for administrative violation. The penalty in this case was reduced because this was a strict liability first-time violation and Spencer Gifts made diligent efforts to cooperate with the investigation. To come into compliance, Spenser will ensure that the vendors they use are aware of the Consumer Products Regulations and that the products they purchase are compliant with the regulations.

Final penalties were determined based on the unique circumstances of this matter, considered together with the need to remove any economic benefit from noncompliance, the goal of deterring future violations and obtaining swift compliance, the consideration of past penalties in similar negotiated cases, and the potential cost and risk associated with litigating these particular violations. The penalty reflects violations extending over a number of days resulting in quantifiable harm to the environment considered together with the complete circumstances of this case. Penalties in future cases might be smaller or larger on a per ton basis.

The final penalty in this case was based in part on confidential financial information or confidential business information provided by Spencer Gifts that is not retained by CARB in the ordinary course of business. The penalty in this case was also based on confidential settlement communications between CARB and Spencer Gifts that CARB does not retain in the ordinary course of business. The penalty also reflects CARB's assessment of the relative strength of its case against Spencer Gifts, the desire to avoid the uncertainty, burden and expense of litigation, obtain swift compliance with the law and remove any unfair advantage that Spencer Gifts may have secured from its actions.

**Is the penalty being assessed under a provision of law that prohibits the emission of pollution at a specified level, and, if so a quantification of excess emissions, if it is practicable to do so.**

The Consumer Product Regulations do not prohibit emissions above a specified level, but they do limit the concentration of VOCs in regulated products. In this case, a quantification of the excess emissions attributable to the violations was practicable because Spencer Gifts made the product formulation and sales data necessary to make this quantification available to CARB. Based upon this information (which Spencer Gifts has designated as confidential), the violations were calculated to have 0.006 tons of excess VOC emissions emitted in California.

- 23. Each provision of this Agreement is severable, and in the event that any provision of this Agreement is held to be illegal, invalid, or unenforceable in any jurisdiction, the remainder of this Agreement remains in full force and effect.
- 24. The Parties shall exchange signed copies of this Agreement. Facsimile, portable document format or photocopied signatures shall be considered as valid signatures as of the date hereof, although the original signature pages shall be provided for CARB records, and shall thereafter be appended to this Agreement.
- 25. The undersigned represent that they have full power and authority to enter into this Agreement.
