

Advanced Clean Fleets Regulation

Notice of Retraction of Fact Sheet

October 16, 2024

On or about November 20, 2023, CARB staff posted a Frequently Asked Questions (FAQ) document regarding “Common Ownership and Control” as that term relates to compliance with the Advanced Clean Fleets (ACF) regulation (November 2023 FAQ). On October 16, 2024, CARB removed the November 2023 FAQ from CARB’s website. CARB advises the public and regulated entities to not reference or rely on the November 2023 FAQ and, in particular, its statements regarding what constitutes “common control” under the ACF. The ACF regulatory language has always and will continue to control application of ACF. In general, FAQs are intended to assist regulated parties to understand regulatory requirements, but CARB is retracting the November 2023 FAQ to avoid any confusion it may have caused.

The retracted November 2023 FAQ document is available at the following links:
