Agenda

- Welcome and Introductions
- Overview of Community Air Grant (CAG) Program
- Cycle 5 Request for Applications (RFA) Overview
- Discussion and Questions
- Wrap Up and Next Steps

Please Take the Zoom Poll

Community Air Grants Overview

[Assembly Bill \(AB\) 617](#) (Garcia, Stats. of 2017, ch. 136)

“CARB shall provide grants to community-based organizations (CBOs) for technical assistance and to support community participation in the implementation of this section and Section 42705.5.”

The Legislature provides funding to CARB to implement AB 617 through the State’s annual budget process.

- Cycle 5 funding from Budget Acts of 2022 and 2023
- [AB 617 Program Funding FAQ](#) for common questions and answers about AB 617 funding

Eligibility

1. **A California 501(c)(3) community-based organization***
2. **A California 501(c)(3) organization*, in partnership with a California non 501(c)(3) community-based organization designated as a sub-grantee**
3. **A California Native American Tribe.** For the purposes of this grant, this includes all Federally Recognized Tribes, and other California Native American Tribes, as defined by Governor's Executive Orders B-10-11 and N-15-19

*Holding tax-exempt status under Section 501(c)(3) federal Internal Revenue Code

Not Eligible

(Not Exhaustive List)

- Individuals
- Schools, school districts, universities, or colleges (public or private)
- California organization holding a tax-exempt status under Section 501(c)(3) of the federal Internal Revenue Code ancillary or affiliated to a local, municipal, city, county, or state governmental agency or entity

CAG Highlights

Award Snapshot

| CAG Cycle | CAGs Awarded | Amount Funded |
|-----------|--------------------|---------------|
| 1 | 27 projects | \$10M |
| 2 | 29 projects | \$5M |
| 3 | 39 projects | \$10M |
| 4 | 42 projects | \$10M |
| Totals | 137 grants awarded | \$35M awarded |

Cycle 5 Highlights: Increased maximum per project, New project type promotion, More staff support

Community Air Protection Funding, Annual Range

| | CAP District Implementation Funding | CAP Incentives | Community Air Grants | Total Funding |
|--------------------------------|--|--|--|---|
| Who administers this funding? | CARB administers to Air Districts | Administered through the Air Districts | CARB administers (through grants) to 501(c)(3) nonprofit CBOs and CA Native American Tribes |  |
| What is this funding used for? | AB 617 Program operation: interpretation, facilitation, CSC stipends, CERP and CAMP development, staffing, outreach, equipment, analysis  | Community-identified projects, clean technology, infrastructure  | Community engagement/outreach, education, monitoring, data collection/analysis, logistical support  |  |
| Funding Fiscal Year | ~\$50M - \$60M  | ~\$195M - \$300M  | ~\$5M - \$10M  | ~\$250M - \$320M  |

Annual Reporting and Progress
Tracking

The California Air Resources Board (CARB) Community Air Protection Program (Program) Community Air Grants (CAGs) invites you to review and respond to its Cycle 5 Request for Applications (RFA) solicitation. Authorized by Assembly Bill (AB) 617 (C. Garcia, Chapter 136, Statutes of 2017), CARB provides grants to community-based nonprofit 501(c)(3) organizations and California Native American Tribes for technical assistance and to support participation in the community air protection process.

- **Cycle 5 Request for Applications (RFA)** - provides the application and instructions, scoring criteria and application considerations for submitting a proposal to CARB for consideration of award for a community air grant. The Cycle 5 RFA was released on September 3, 2024.
 - **Appendices A through C** included in Cycle 5 RFA document above
 - **Appendix D - Definitions and Acronyms**
 - **Appendix E - Sample Draft Grant Provisions**
 - **Appendix F - Grant Application Coversheet**
 - **Appendix G - Grant Work Plan Template**
 - **Appendix H - Grant Budget Template**
 - **Appendix I - Sample Tribal Resolution**
 - **Appendix J - Sample Nonprofit Organization Board Resolution**
 - **Appendix K - Payee Data Record (STD 204) form**

Cycle 5 Final Request for Applications

- **Application deadline: November 1, 2024**
- RFA Contents:
 - Cycle 5 Priorities and Timeline
 - Eligibility
 - Maximum award: Educational projects - \$300K, Technical and Focused -\$500K
 - Application Submittal Checklist (3 pages)
 - Application and Instructions, and Writing Tips

Cycle 5 Final Request for Applications - 2

Contents continued:

- Eligible and Ineligible Costs
- Project Types and Sample Objectives
- Scoring Criteria
- CARB Resources for Applicants
- Appendices including:
 - Grant Application Coversheet (2 pages)
 - Grant Work Plan Template (Microsoft Word document)
 - Grant Budget Template (Microsoft Excel file)
 - Sample Resolution
 - Payee Data Record

Cycle 5 Community Air Grant Priorities

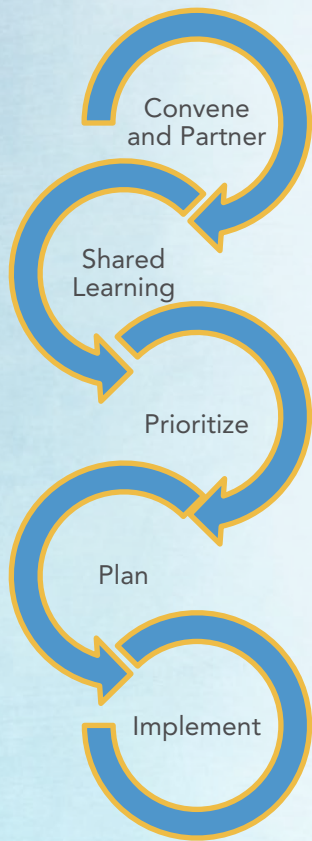

1. Equitable participation and local partnership building, coordination, and collaboration.
2. Foster workforce development and training.
3. Advance equity and environmental justice.
4. Promote transferability of emissions reduction strategies contained in CERPs to other communities.
5. Build community capacity to engage in the Program to develop and implement Local Community Emission Reduction Plans (L-CERPs).
6. Provide Program benefits to disadvantaged communities disproportionately impacted by air pollution.

Cycle 5 Project Requirements

Must be wholly located in and benefit disadvantaged and/or low-income communities to maximize benefits to priority populations.

Must provide direct, meaningful and assured benefits to priority populations, as identified pursuant to Senate Bill 535 and AB 1550, which includes California Native American tribal lands or tribal communities.

Community Air Protection Process and CAG Project Types

| | Project Types | Max Award |
|---|--------------------|-----------|
| Building Capacity; Air Quality Education | EDUCATIONAL | \$300K |
| Air Quality Monitoring | TECHNICAL | \$500K |
| Local Community Emission Reduction Plans Emission Reduction Strategies Expansion | FOCUSED | \$500K |

Tips for Application Writing

Pursue the SMARTIE grant objective approach

- Ensure the project is

| |
|-------------------|
| Specific |
| Measurable |
| Achievable |
| Relevant |
| Timeframe |
| Inclusive |
| Equitable |

- For SMARTIE goal setting, refer to <https://www.managementcenter.org/resources/smartie-goals-worksheet/>

Specific Information Required for Evaluation

1. General Project Information
2. Organization Background
3. Partnerships, Collaboration, and Leveraging
 - A. Letters of Support, Letters of Commitment
4. Work Plan Tasks and Timelines
5. Budget
6. Programmatic Alignment

CAG Project Highlights

Previous grantees:

What are you most proud of having accomplished in your past grant?

For current grantees:

What are you most excited about achieving through your project?

Grant Timeline

Application and Award

- **Nov 1, 2024** – Cycle 5 Application Deadline
- **Nov 2024 – Feb 2025** – Application Review, Recommendations for Award
- **March 2025** – CARB Selection of Grant Awards
- **March 2025 – May 2025** – Grant Agreement Development
- **June 2025** – Grant Term and Project Period Starts
- **July 2025** – Grantee Kickoff and Project Orientation Meetings
- **March or Dec. 2027** – Grant Term Ends, dependent upon funding awarded

Discussion and Questions

1. What questions or comments do you have about any of the project types (for example, educational, or technical, or focused projects)?
2. What questions do you have about the RFA?

Community Air Quality Viewer (AQview)

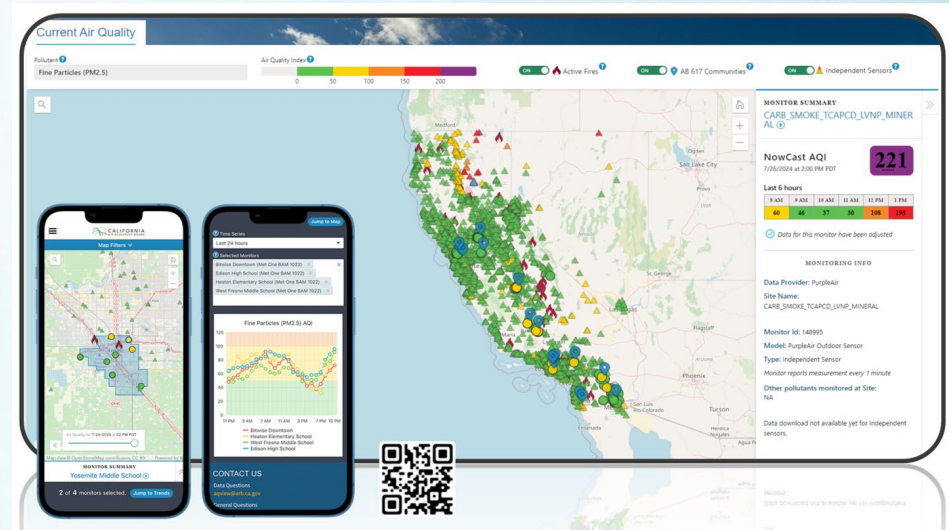

Liyi Monier, Allison Cook

Community Air Quality Section
Air Quality Planning & Science Division / Special Assessment Branch

Presentation at Community Air Grants Workshop | September 30 & October 8 , 2024

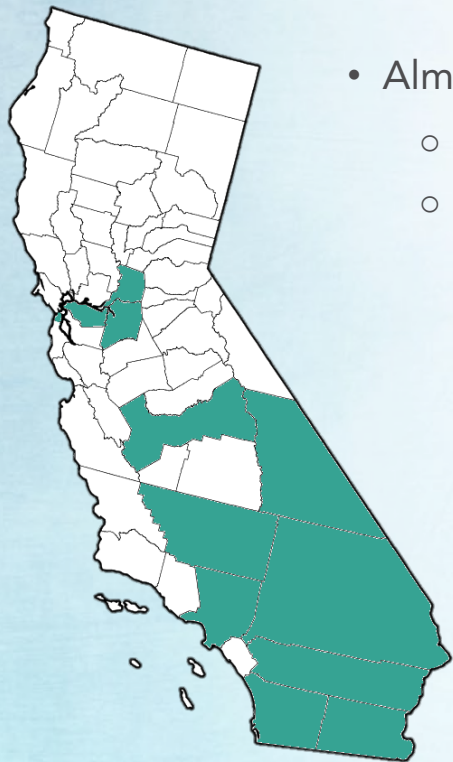

About AQview

- The **only centralized** data system for community air monitoring data in California
- Designed with simple, intuitive, and **mobile-friendly** interfaces
- Offers visualization and easy access of air quality data from **diverse sources** in **near real-time**
- Provides **transparent information** in how data are collected and processed

<https://aqview.arb.ca.gov/>

Data in AQview

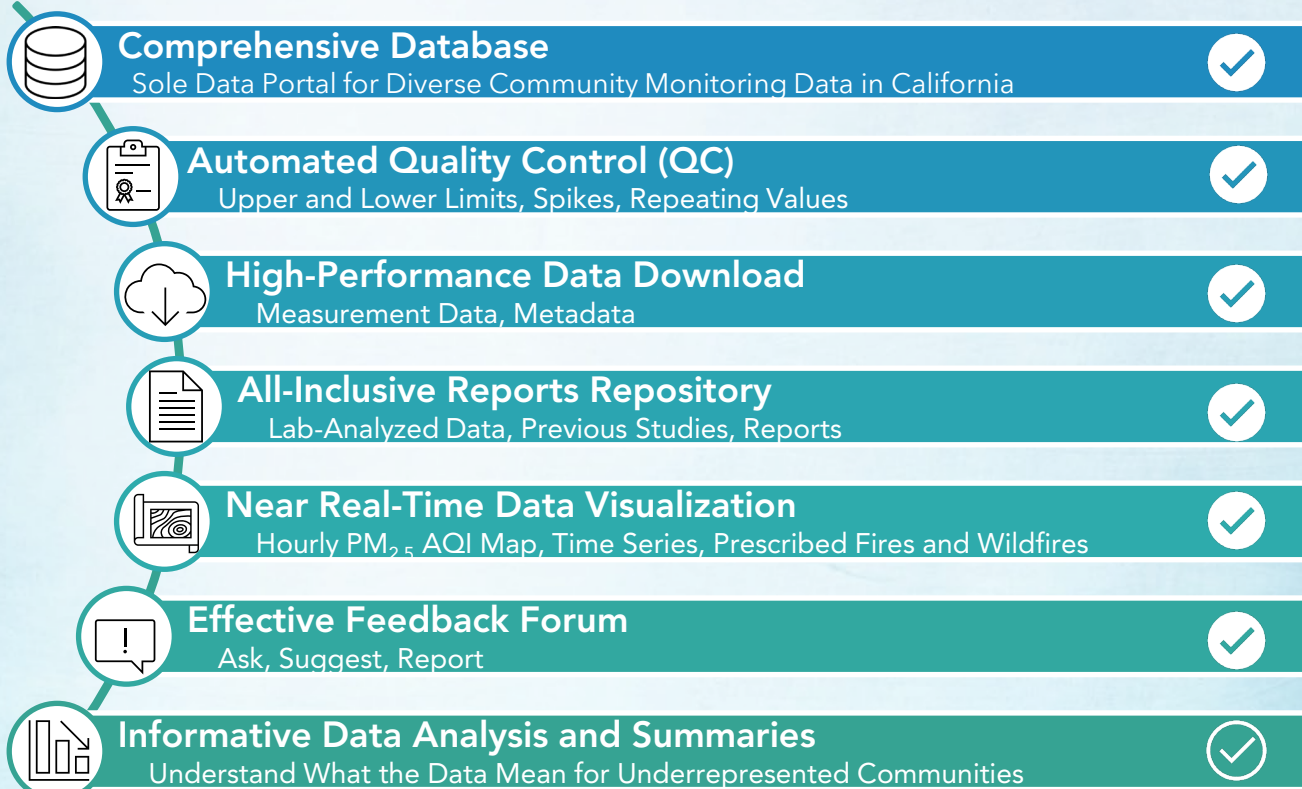

- Almost **200** community monitoring sites in California from seven air districts
 - Sixteen AB 617 communities
 - Some air grant projects

| Air District | Communities/ Networks | Sites | Pollutants* |
|------------------------|--------------------------|-------|--|
| San Francisco Bay Area | 3 | 71 | PM _{2.5} , PM ₁₀ |
| Sacramento Valley | 1 | 22 | PM _{2.5} , PM ₁₀ , VOCs |
| San Joaquin Valley | 5 | 25 | PM _{2.5} , PM ₁₀ , Gases, VOCs |
| Great Basin | 1 | 1 | PM _{2.5} , PM ₁₀ |
| South Coast | 7 | 18 | PM _{2.5} , PM ₁₀ , Gases, VOCs |
| San Diego | 2 | 7 | Black Carbon |
| Imperial | 2 | 46 | PM _{2.5} , PM ₁₀ |

**Availability of pollutants varies by site.*

Features of AQview

✓ Future

High-Performance Data Download

Continuous Monitoring

This download tool provides air quality data from monitors that are continuously streaming to AQview and are updated on an hourly basis. Data available here are primarily from AB 617 community air quality monitoring sites. As AQview continues to expand, monitoring data from a larger variety of sources will be added to this download tool. For technical details about the data provided here, please see the [Data Download Explorer](#). An inventory of the data available from the Download Tool can be found in our [Data Catalog](#).

Download

Disclaimer: Files available for download here may contain preliminary data that have not been verified or extensively quality assured. These data should not be used for regulatory purposes (e.g. determining whether areas meet ambient air quality standards).

- Houses over **110 million** records in AQview database and the number is growing every day
- Allows downloads of up to **1 million** records in about **1 minute**
- Provides **standardized data with quality control flags and metadata** information

The diagram illustrates four quality control checks for air quality data, each represented by a circular callout and a corresponding data visualization:

- Instrument-Based Upper Limit Check:** A scatter plot showing data points following a linear trend, with several points highlighted in red at the upper end of the scale, indicating values that exceed the instrument's upper limit.
- Instrument-Based Lower Limit Check:** A line graph showing a highly volatile signal. A horizontal red dashed line is drawn at the bottom of the plot, indicating values that fall below the instrument's lower limit.
- Repeating Values Check:** A line graph showing a signal that fluctuates but then settles into a constant, repeating value for a period, highlighted with a red dashed line, indicating a potential sensor malfunction or data entry error.
- Statistical Outlier Check:** A scatter plot showing a distribution of data points. A single point is highlighted in red, lying significantly above the rest of the data cluster, indicating a statistical outlier.

All-Inclusive Reports Repository

- Hosts **various** non-continuous data and study reports
- Makes data files available **promptly**
- Accommodates **variety** of file types
- Provides community-level **pesticides** and **air toxics** monitoring data

| Additional Monitoring & Reports | | | | | |
|--|--------------------------|----------------------------------|-------------------|---|--------------|
| These air basin specific tables are a repository of air quality data, reports, and other data products primarily from selected AB 617 communities and other recent community monitoring efforts. These data do not conform to the AQview continuous data format (e.g., lab-analyzed data, mobile monitoring data, etc.), and are therefore not available from the Continuous Monitoring Download Tool. For more detailed information on these data, please visit the Data Source links in each table below or contact the data provider directly. Additional data will be added as they become available. The tables below are a repository of various plots that display air quality trends, or how air quality has changed over longer time periods. The air quality data used to create the graphs available on this website are either from regulatory monitoring efforts or the toxic sampling network. For more detailed information on these graphs or the data used to produce them, please visit the "Data Source" links in each table below or contact the data provider directly. Scripts for creating some of these plots along with sample data files are available at the bottom of this page. Additional graphs will be added, and existing plots will be updated as new data become available. | | | | | |
| Sacramento Valley | | | | | |
| San Diego | | | | | |
| San Joaquin Valley | | | | | |
| South Coast | | | | | |
| Data Provider | Area Monitored | Pollutant(s) | Monitoring Period | Files & Links | Last Updated |
| CARB | Eastern Coachella Valley | Pesticides | 11/2022-02/2023 |  Raw Data (11/22-02/23)  ECV Pesticide Monitoring Final Report | 01/31/2024 |
| Soboba Band of Luiseno Indians | Soboba Reservation | PM10, PM2.5 | 09/2021 - 08/2022 |  Raw Data (09/21-08/22)  Data Source | 09/15/2022 |
| SCAQMD | South Coast Air Basin | UFPs, PM2.5, VOCs, PAHs, and TSP | 01/2018 - 04/2019 |  Raw Data (01/18-04/19)  MATES V Final Report  Data Source | 04/01/2022 |

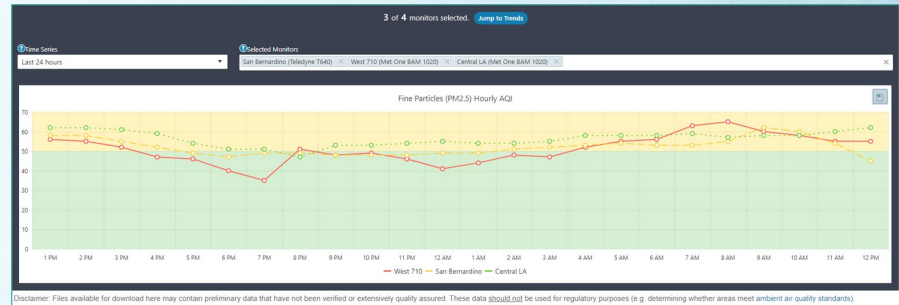

Near Real-Time Data Visualization

- Analyzes recent trends at **multiple sites** through a **user-friendly** interface
- Enables **cross comparison** of data from different projects and in different areas

- Provides PM_{2.5} air quality data in **near-real-time** to inform daily activities
- Encompasses data from more than 7,000 independent **sensors** statewide
- Includes location of **wildfires and prescribed fire**

Did a company help create the AQView platform, and if so, which company? It is a wonderful platform and I would be interested in replicating for my state.

Ask a question | 6 days ago | Like | Dislike

Map, 24-hr slider: add an animation feature that could loop the images in a little movie so we could see the "bubbles" change color over that time period?

Start a discussion

Suggest new feature | 9 months ago | Like | Dislike

The map is great, but I would love to see more pollutants.

Start a discussion

Which air monitors/sensors are compatible with the AQ View system?

Comment Response

Hi, thanks for your interest in AQView! AQView can accept real-time data from any air quality monitor/sensor if it is submitted in the correct AQView format. Additionally, AQView can pull data for Clarity Nodes, and we are working on a method to pull data for PurpleAir sensors. Please email AQView@arb.ca.gov if you are interested in learning more about the data format and/or submission procedures.

Ask a question | 2 months ago | Like | Dislike

This new VIEWER is the best visual representation of community air quality I have ever seen!!! EXCELLENT work. Looking forward to seeing new features such as data analysis and interpretation summaries in the near future. Thank you.

Start a discussion

Other feedback | 8 months ago | Like | Dislike

On the map, my selected site was not highlighted. While I read the monitoring summary I would like to see the highlighted or different colored circle of the selected site.

Start a discussion

Comment on existing feature | 1 year ago | Like | Dislike

Is AQView meant to replace AQMIS in the future, or supplement it?

Comment Response

Thanks for the interest. The plan is to integrate AQView and AQMIS (the data management system for regulatory monitoring data in California) into one single platform to provide a one-stop shop for users to access the data.

Start a discussion

Ask a question | 9 months ago | Like | Dislike

It would be nice if I could select individual sites to download the data

Comment Response

Thanks for the suggestion! Our Team is actively working on including a site selection field in the download tool. Stay tuned to see it in a future version of AQView.
