Alternative Diesel Fuels Regulation

Reporting Summary – 2021

The Alternative Diesel Fuels (ADF) regulation, which became effective January 1, 2016, requires regulated parties to report produced, imported, and blended amounts of all biodiesel blendstock and the biodiesel blends produced. The table below is a summary of ADF reporting in 2021 and shows the volumes of B100/B99 blendstock imported and produced, as well as the percentages of B100/B99 blendstock blended to produce final blends of B20 and below.

Alternative Diesel Fuels Reporting Summary 2021

	Total B100/B99 Volume Imported/Produced	Percentage of B100/B99 blended to produce B5	Percentage of B100/B99 blended to produce B10	Percentage of B100/B99 blended to produce B15	Percentage of B100/B99 blended to produce B20
2021 Q1	50,619,956	48.3%	5.4%	6.7%	39.6%
2021 Q2	55,183,217	43.3%	1.5%	7.2%	48.0%
2021 Q3	64,410,807	45.5%	1.0%	7.0%	46.5%
2021 Q4	63,503,760	45.6%	1.7%	7.3%	45.3%
Total	233,717,740	45.5%	2.3%	7.1%	45.1%
