

## **Proposition 1B: Goods Movement Emission Reduction Program**

December 2024 SEMI-ANNUAL STATUS REPORT

This status report provides an update on the implementation of the \$1 billion Proposition 1B Goods Movement Emission Reduction Program (Program) to reduce emissions and health risk from freight operations in California's four priority trade corridors (Los Angeles/Inland Empire, Central Valley, Bay Area, and San Diego/Border). Consistent with State law, the Program Guidelines for Implementation (Guidelines) and related documents detail the grant/contract requirements for the California Air Resources Board (CARB), participating local agencies, and equipment owners, please see the Program's website at:

<https://ww2.arb.ca.gov/our-work/programs/proposition-1b-goods-movement-emission-reduction-program>.

CARB adopts the Guidelines, then solicits, awards, funds, and oversees grants to local agencies like air districts and seaports. The local agencies offer grants or contracts, through a competitive process, to diesel equipment owners to co-fund the upgrade of diesel equipment to cleaner technologies ahead of or beyond regulatory requirements to do so.

To ensure accountability and effective use of these public funds, the local agencies solicit for eligible projects, review applications, inspect the old equipment, provide data to rank each piece of equipment based on emission reductions and cost-effectiveness, sign grants or contracts with equipment owners, inspect the upgraded equipment, make payment for the cleaner technology, and track/report on funded projects.

The information in this report is based on the local agencies' semi-annual project reports as of September 30, 2024, and supplemented with information in the Program's Goods Movement Online Database. The information is reported by year of funding, as defined below.

- Year 6: Awarded February 2020 Executive Order.
- Year 5: Awarded September 2015 Board Meeting.
- Year 4: Awarded July 2013 Board Meeting.
- Year 3: Awarded December 2011 Board Meeting - drayage truck projects only.
- Year 2: Awarded June 2010 and December 2011 Board Meetings.
- Year 1: Awarded May 2008 Board Meeting.

## **Available Funding and Expenditures**

Each budget appropriation authorizes CARB to use a specific amount of funding for the Program, within statutory timeframes. However, the appropriation does not provide any cash for this purpose. Therefore, the Program depends on the receipt of proceeds from State bond sales or other mechanisms to fund new projects.

The entire \$1 billion has been appropriated in State budgets (over multiple years), with \$980 million to CARB for this Program and \$20 million set aside by the control agencies to cover bond issuance and oversight costs.

## **Proposition 1B: Goods Movement Emission Reduction Program**

December 2024 SEMI-ANNUAL STATUS REPORT

CARB has allocated \$980 million including \$938 million for local agency projects and about \$42 million for CARB's administration costs over multiple years. CARB has paid about \$947 million to local agencies and for CARB's administration costs through September 2024.

### **Local Agency Awarded Funds**

**Year 6.** In February 2020, approximately \$24 million was awarded for truck projects throughout the State from reallocated funds from the unused truck filter substrate replacement project, loan assistance, and unused project funds.

**Year 5.** In September 2015, the Board awarded approximately \$221 million for truck, locomotive, ships at-berth/cargo handling equipment, transport refrigeration unit (TRU), commercial harbor craft, and truck filter substrate replacement projects throughout the State. CARB approved the local agencies' request that funds not utilized from prior year grants due to project fallout be made available for Year 5 truck projects; this currently includes \$45.7 million from grant amendments and fund transfers.

**Year 4.** In July 2013, the Board awarded approximately \$143 million for truck projects throughout the State, including funds for loan assistance. In addition, over \$6 million was awarded for a truck filter substrate replacement project and nearly \$1 million for commercial harbor craft projects. Any funds not utilized for projects were reallocated to Year 5 truck projects.

**Year 2 and Year 3.** CARB received funds for these projects in 2010 and 2011 from multiple bond sales. In June 2010, the Board awarded \$200 million in available cash primarily for truck projects and ships at-berth/cargo handling equipment projects, with smaller grants for locomotive and commercial harbor craft projects. In December 2011, the Board awarded and allocated approximately \$122 million from bond sales and funds redirected from CARB's administration costs for truck projects. Any funds not utilized for projects were reallocated to Year 4 truck projects.

**Year 1.** The first year funds of approximately \$246 million were used for projects to upgrade trucks, locomotives, and ships at-berth. All of these projects were suspended for 6 to 14 months due to the December 2008 "stop work" order on bond-funded programs, which resulted in an extended delay from the time of application to contract. This led to some funds being unused by the local agencies; grant agreements were amended to transfer funds from undersubscribed grants to oversubscribed grants.

## Proposition 1B: Goods Movement Emission Reduction Program

December 2024 SEMI-ANNUAL STATUS REPORT

### Project Results

The Program bond monies have leveraged substantial match funding from private, local, and federal sources – more than one match dollar for every Program dollar invested.

**Year 6.** CARB executed grant agreements worth \$23.6 million with five local air districts for the replacement of heavy-duty truck projects. As of September 2024, \$1.7 million has been expended by the San Joaquin District. The Sacramento District has held two solicitations in 2022 and funded seven zero-emission trucks. Originally planned for 2024, the remaining air districts anticipate holding solicitations in 2025.

**Year 5.** Local agencies continue to implement these projects and expect over 2,500 pieces of equipment to be upgraded including over 1,100 natural gas (over 1,000 low-NOx) and over 200 zero-emission trucks. Of the 2,500 projects, over 1,200 trucks, 47 tier-four locomotives, six commercial harbor craft, 26 cargo handling equipment, and 490 TRU electric power plugs are operational. The majority of the remaining projects are expected to be operational in 2025.

**Year 4 and 5.** The Sacramento District was the implementing local agency for the Filter Substrate Replacement project. The project is complete with the replacement of 505 filter substrates on heavy-duty trucks.

**Years 1 to 4.** These projects are complete and all equipment is operational. The following information is by source category.

**Trucks:** More than 12,800 cleaner trucks are operating in the four priority trade corridors. The upgraded equipment includes approximately 1,600 trucks retrofitted with diesel soot filters and the replacement of over 600 trucks with new cleaner natural gas trucks. Small truck fleets (1 to 3 trucks) have received funding to upgrade about 5,400 trucks.

**Ships At-Berth:** The Bay Area District's early grant project to install grid-based electrical power for three berths at the Port of Oakland has been operational since 2011. The installation of grid-based electrical power was completed in late 2013 for eight berths at the Port of Oakland and 25 berths at the Ports of Long Beach, Los Angeles, and Hueneme under the Year 2 grant projects. The funded berths were ready for ships to begin to plug into the grid in early 2014.

**Locomotives and Commercial Harbor Craft:** The Sacramento and South Coast Districts completed the upgrade of 25 locomotives that are operating in the Central Valley and the Los Angeles/Inland Empire trade corridors. In addition, the San Diego District has completed three commercial harbor craft upgrades.

## **Proposition 1B: Goods Movement Emission Reduction Program**

December 2024 SEMI-ANNUAL STATUS REPORT

### **Project Benefits – Years 1 to 6**

When fully implemented, the Program expects projects included in this report will reduce over five million pounds, or 2,500 tons, of particulate matter (PM 2.5), plus over 173 million pounds, or 86,000 tons, of oxides of nitrogen (NOx). Emission reductions for projects funded with Year 1 through Year 3 grants are calculated over the life of their grant term (e.g., two to five years for trucks and ten years for ships at-berth). Emission reductions for the Year 4 through Year 6 grants take into consideration CARB’s regulations and include only the portion of the emission reductions that are early or extra to these regulations. Additionally, emission reductions are based on completed projects and estimates for Year 5 projects and estimates for Year 6 projects.

### **Project Status**

The tables on the following pages present the information by trade corridor (Table 1), source category (Table 2), and by grant agreement (Tables 3 through 8), and is based on the September 30, 2024, local agency reports and supplemented with additional information from the Districts, and the most current grant amendments. The number of equipment and emission reductions for Year 5 and Year 6 projects are estimates and will continue to be updated in subsequent reports as equipment becomes operational and projects and grants are completed.

**Proposition 1B: Goods Movement Emission Reduction Program**

<sup>1</sup> Completed projects include 1,066 natural gas replacements (966 low-NOx), 25 zero-emission, and 696 retrofits.<sup>2</sup> Completed projects include 561 natural gas replacements and 891 retrofits.<sup>3</sup> See Table 7 for details.<sup>4</sup> See Table 8 for details.

**Proposition 1B: Goods Movement Emission Reduction Program**

December 2024 SEMI-ANNUAL STATUS REPORT

**TABLE 3A: LOS ANGELES/INLAND EMPIRE TRADE CORRIDOR – South Coast AQMD**

<b>Funding Year</b>	<b>Category</b>	<b>Project Description/ Grant Number</b>	<b>Grant Amount</b>	<b>Emission Reductions (pounds) of PM 2.5</b>	<b>Emission Reductions (pounds) of NOx</b>	<b>Current Project Status</b>
Year 6	Other Trucks	Replace old, dirty trucks with newer, clean models. GMB19-L1	\$6,406,088	0 <sup>1</sup>	1,910,000	Grant agreement executed in December 2020.
Year 5	Other Trucks	Replace old, dirty trucks with newer, clean models. GMB14-L1/13GML01	\$118,603,048	4,000	4,633,000	District has signed contracts for 1,107 trucks. 822 trucks have been scrapped and replaced with much cleaner trucks, including 750 natural gas (725 low-NOx) and 16 zero-emission.
Year 5	Ships At-Berth/ Cargo Handling Equipment	Eliminate or reduce emissions from ships at-berth and replace old, dirty cargo handling equipment with newer, clean models. GMB14-L1	\$916,700	1,000	43,000	District has signed contracts for 3 zero-emission yard trucks. 3 yard trucks have been scrapped and replaced with much cleaner yard trucks.
Year 5	Locomotives	Replace old, dirty locomotives with newer, clean models. GMB14-L1	\$16,475,048	84,000	2,236,000	Project complete. 10 locomotives have been replaced with much cleaner locomotives.
Year 5	Transport Refrigeration Units	Replace old, dirty TRUs with newer, clean models. GMB14-L1	\$1,884,308	6,000	313,000	District has signed contracts for 407 electric power plugs. 23 electric plugs have been replaced.

<sup>1</sup> PM 2.5 emissions vary depending on truck project type; these projects have not yet been executed. The majority of trucks would have already installed a filter (or have an OEM filter if they are MY07-09) due to compliance date requirements in the Truck and Bus Regulation. If a truck has a filter installed, the PM reductions are not credited to the Proposition 1B Program.

**TABLE 3A (continued): LOS ANGELES/INLAND EMPIRE TRADE CORRIDOR - South Coast AQMD**

<b>Funding Year</b>	<b>Category</b>	<b>Project Description/ Grant Number</b>	<b>Grant Amount</b>	<b>Emission Reductions (pounds) of PM 2.5</b>	<b>Emission Reductions (pounds) of NOx</b>	<b>Current Project Status</b>
Year 4	Other Trucks	Replace old, dirty trucks with newer, clean models. 13GML01/G11GMLT1	\$79,480,170	180,000	13,407,000	Grant complete. 1,809 old trucks have been scrapped and replaced with much cleaner trucks.
Year 3	Priority Drayage Trucks	Replace old, dirty trucks with newer, clean models serving ports and railyards. G11GMLP1	\$3,302,250	1,000	973,000	Grant complete. 104 old trucks have been scrapped and replaced with much cleaner trucks.
Year 2	Other Trucks	Retrofit trucks with soot filters and replace old, dirty trucks with newer, clean models. G11GMLT1/G08GMLT1	\$88,111,486	488,000	14,522,000	Grant complete. 1,522 old trucks have been scrapped and replaced with much cleaner trucks, including 2 natural gas. 386 trucks have been retrofitted with soot filters. 1 truck stop/distribution center electrification project has been completed.
Year 2	Ships At-Berth/ Cargo Handling Equipment	Eliminate or reduce emissions from ships at-berth and/or cargo equipment at ports and intermodal railyards. G08GMLS1	\$58,641,886	343,000	21,841,000	Grant complete. Installation of shore power equipment for 25 berths (12 at Port of Long Beach, 10 at Port of Los Angeles, 3 at Port of Hueneme) is complete with ships plugging into the grid starting in January 2014.
Year 2	Locomotives	Replace old, dirty locomotives with newer, clean models. G08GMML1	\$4,635,000	27,000	315,000	Grant complete. 6 locomotives have been repowered with much cleaner engines.

**TABLE 5: BAY AREA CORRIDOR – Bay Area AQMD**

<b>Funding Year</b>	<b>Category</b>	<b>Project Description/ Grant Number</b>	<b>Grant Amount</b>	<b>Emission Reductions (pounds) of PM 2.5</b>	<b>Emission Reductions (pounds) of NOx</b>	<b>Current Project Status</b>
Year 6	Other Trucks	Replace old, dirty trucks with newer, clean models. GMB19-B1/GMB18-B1	\$12,425,740	0 <sup>1</sup>	3,704,000	Grant executed May 2020 for \$10.8 million and grant amendment for an additional \$1.6 million executed in September 2020.
Year 5	Other Trucks	Replace old, dirty trucks with newer, clean models. GMB14-B1/13GMB01	\$20,259,749	0	675,000	District has signed contracts for 117 trucks and 81 trucks have been scrapped and replaced with much cleaner trucks including 60 natural gas (58 low-NOx) and 1 zero-emission.
Year 5	Ships At-Berth/ Cargo Handling Equipment	Eliminate or reduce emissions from ships at-berth, and replace old, dirty cargo handling equipment with newer, clean models. GMB14-B1	\$4,544,530	2,000	54,000	District has signed contracts for 39 cargo handling equipment including zero-emission yard trucks and forklifts. 15 yard trucks have been scrapped and replaced with much cleaner yard trucks. 8 forklifts have been scrapped and replaced with much cleaner forklifts.
Year 5	Locomotives	Replace old, dirty locomotives with newer, clean models. GMB14-B1	\$13,002,516	52,000	1,124,000	Project complete. 9 locomotives have been scrapped and replaced with much cleaner locomotives.
Year 5	Transport Refrigeration Units	Replace old, dirty TRUs with newer, clean models. GMB14-B1	\$50,400	0	2,000	Project complete. 4 electric power plugs have been installed.

<sup>1</sup> PM 2.5 emissions vary depending on truck project type; these projects have not yet been executed. The majority of trucks would have already installed a filter (or have an OEM filter if they are MY07-09) due to compliance date requirements in the Truck and Bus Regulation. If a truck has a filter installed, the PM reductions are not credited to the Proposition 1B Program.

**Proposition 1B: Goods Movement Emission Reduction Program**

December 2024 SEMI-ANNUAL STATUS REPORT

**TABLE 5 (continued): BAY AREA CORRIDOR - Bay Area AQMD**

<b>Funding Year</b>	<b>Category</b>	<b>Project Description/ Grant Number</b>	<b>Grant Amount</b>	<b>Emission Reductions (pounds) of PM 2.5</b>	<b>Emission Reductions (pounds) of NOx</b>	<b>Current Project Status</b>
Year 4	Other Trucks	Replace old, dirty trucks with newer, clean models. 13GMB01/G11GMBT1	\$8,525,519	17,000	1,794,000	Grant complete. 220 old trucks have been scrapped and replaced with much cleaner trucks, including 6 natural gas.
Year 3	Priority Drayage Trucks	Replace old, dirty trucks with newer, clean models serving ports and railyards. G11GMBP1	\$10,311,000	1,000	2,678,000	Grant complete. 357 old trucks have been scrapped and replaced with much cleaner trucks.
Year 2	Other Trucks	Retrofit trucks with soot filters and replace old, dirty trucks with newer, clean models. G11GMBT1/G08GMBT1	\$18,178,650	84,000	2,574,000	Grant complete. 348 old trucks have been scrapped and replaced with much cleaner trucks, including 4 natural gas. 28 trucks have been retrofitted with soot filters.
Year 2	Ships At-Berth/ Cargo Handling Equipment	Eliminate or reduce emissions from ships at-berth and/or cargo equipment at ports and intermodal railyards. G08GMBS1	\$15,927,381	91,000	5,305,000	Grant complete. Installation of shore power equipment for 8 berths at the Port of Oakland is complete with ships plugging into the grid starting in January 2014.

**Proposition 1B: Goods Movement Emission Reduction Program**

**TABLE 5 (continued): BAY AREA CORRIDOR – Bay Area AQMD**

<b>Funding Year</b>	<b>Category</b>	<b>Project Description/ Grant Number</b>	<b>Grant Amount</b>	<b>Emission Reductions (pounds) of PM 2.5</b>	<b>Emission Reductions (pounds) of NOx</b>	<b>Current Project Status</b>
Year 1	Drayage Trucks	Retrofit trucks with soot filters and replace old, dirty trucks with newer, clean models. G07GMBP1	\$14,526,891	174,000	1,892,000	Grant complete. 203 old trucks have been scrapped and replaced with much cleaner trucks. 889 trucks have been retrofitted with soot filters.
Year 1	Other Trucks	Retrofit trucks with soot filters and replace old, dirty trucks with newer, clean models. G07GMBT1	\$10,462,200	81,000	1,978,000	Grant complete. 198 old trucks have been scrapped and replaced with much cleaner trucks. 13 trucks have been retrofitted with soot filters.
Year 1	Ships At-Berth	Install grid-based shoreside electrical power at three berths at the Port of Oakland so ships can plug in and turn off their engines while docked. G07GMBS1	\$2,422,290	20,000	1,164,000	Grant complete. Installation of shore power equipment for 3 berths at the Port of Oakland with ships plugging into the grid starting in 2011.
Year 1	Harbor Craft	Replace old, dirty engines in harbor craft with new, clean engines. G07GMBH1	\$0	0	0	Grant terminated and funds transferred to the existing port truck grant G07GMBP1, at the District's request.

**TABLE 8: STATE AGENCY - LOAN ASSISTANCE - Trucks Only**

<b>Funding Year</b>	<b>Category</b>	<b>Project Description/ Grant Number</b>	<b>Grant Amount</b>	<b>Emission Reductions (pounds) of PM 2.5</b>	<b>Emission Reductions (pounds) of NOx</b>	<b>Current Project Status</b>
Year 4	CARB	Loan assistance to replace old, dirty trucks with newer, clean models.	\$0	N/A	N/A	The \$5.3 million was not needed for loan assistance and has been reallocated to the local agencies.
Year 3	CARB	Loan assistance to replace old, dirty trucks with newer, clean models serving ports and railyards.	\$1,668,227	Included in the Bay Area and South Coast Districts' FY2011-12 Priority Drayage Reserve Grants.	Included in the Bay Area and South Coast Districts' FY2011-12 Priority Drayage Reserve Grants.	Loan assistance to help replace drayage trucks funded under the priority drayage reserve through the South Coast and Bay Area Air Districts. Loan assistance is improved access to financing through the California Capital Access Program with funds used for a loan loss reserve account if a truck owner defaults on their loan. 136 truck projects have utilized the loan assistance program. The \$3.3 million not needed for this project has been reallocated to the local agencies.
