

## **Agricultural Vehicle, Equipment, and Infrastructure Survey**

*If you're a California farmer, processor, or custom operator, we need your input to support air quality and infrastructure planning efforts*

# 2024-25 Agricultural Vehicle, Equipment, and Infrastructure Survey

---

The California Air Resources Board (CARB), California Energy Commission (CEC), and California Public Utilities Commission (CPUC), with the support of the California agricultural community, is requesting your participation in a new survey.

Results from the previous survey informed the distribution of hundreds of millions of dollars of subsequent incentive funding across California. This new survey will continue to support incentive programs, air quality planning efforts at CARB, and inform energy and infrastructure planning at CEC and CPUC.

The 2024-25 agricultural survey covers on-road vehicles and mobile off-road agricultural equipment of all fuel types, including electric equipment, used by producers in the field, custom operators, and first processing facilities.

**If you are a California farmer, processor, or custom operator, participate in the survey using the QR code to the right or from the website below.**
