[Remediation Eligibility for Olympus Terminal.pdf](#)

---

Hello Martin,

CARB approves the request from Olympus Terminals LLC (“Olympus”) to extend the Prospective Eligibility granted on December 26, 2024, for vessel visits to Olympus’s terminal at Port of Long Beach to use the remediation fund compliance option. CARB understands that Olympus intends to use the contracted barge for emissions capture as soon as it receives CARB Executive Order approval.

Original eligibility period: January 1 – May 31, 2025

**Extended eligibility period: January 1 – June 30, 2025**

All the terms and conditions from CARB’s letter dated March 27, 2025 (attached), except the new end date of June 30, 2025, continue to apply during Olympus’s extended Prospective Eligibility period. If CAECS service is not yet available for any/all visits to Olympus’s terminal by the end date of the requested eligibility period, Olympus may reapply to receive another prospective eligibility determination for an additional period.

Best regards,
