### **Purpose**

The California Air Resources Board (CARB) staff invites you to participate in a public meeting as part of CARB's work on developing an embodied carbon reporting regulation pursuant to Assembly Bill 2446 (Holden) and Assembly Bill 43 (Holden). At this meeting, participants will discuss in detail the methodology used to estimate the 2026 point-in-time baseline for California's greenhouse gas emissions from the building sector. This meeting will be a collaborative discussion among CARB program staff and external parties from academia, industry, and non-profits. Interested parties, outside experts, and members of the public are invited to attend either in-person or online via Zoom.

This meeting is the first of two technical meetings on the development of embodied carbon reporting regulation. Staff plan to hold the second technical meeting, a full day session covering reporting requirements for covered building materials and covered projects, in October 2025.

Materials will be posted prior to the meeting on [\*CARB's Embodied Carbon website\*](#), where more information on the program can also be found.
