

Survey Introduction

The Technical Working Group (TWG)

In [Resolution 22-6](#) approving the amendments to the Commercial Harbor Craft (CHC) Regulation on March 24, 2022, CARB's Board directed staff to form a Technical Working (TWG) Group to assess the commercial availability of lower-emitting combustion engines and zero-emission technology for harbor craft and report back to the Board by December 31, 2024 and every two years thereafter through December 31, 2032. The TWG welcomes all affected stakeholders including vessel operators, industry associations, environmental and community-based organizations, community members, zero-emission or alternative fuel technology developers, engine and after-treatment manufacturers, academic institutions, government agencies, and members of the public.

The following questionnaire is an introductory survey, which will help the facilitation team to better understand TWG participants' interests, concerns, and informational needs for this effort. The purpose of this survey is solely informational and voluntary. Do not submit confidential data with this survey.

1. Please provide your name, title, affiliation, and contact information.

- Add Text Box

2. What do you hope to achieve for your organization / constituents by participating in the Commercial Harbor Craft (CHC) Regulation, Technical Working Group (TWG)?

- Add Text Box
